LAW 36: OUT LBW

Defining the LBW rule in Cricket

LEARNING OBJECTIVES

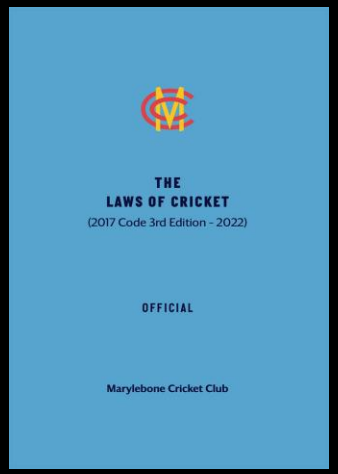
By the end of this lesson, I will...

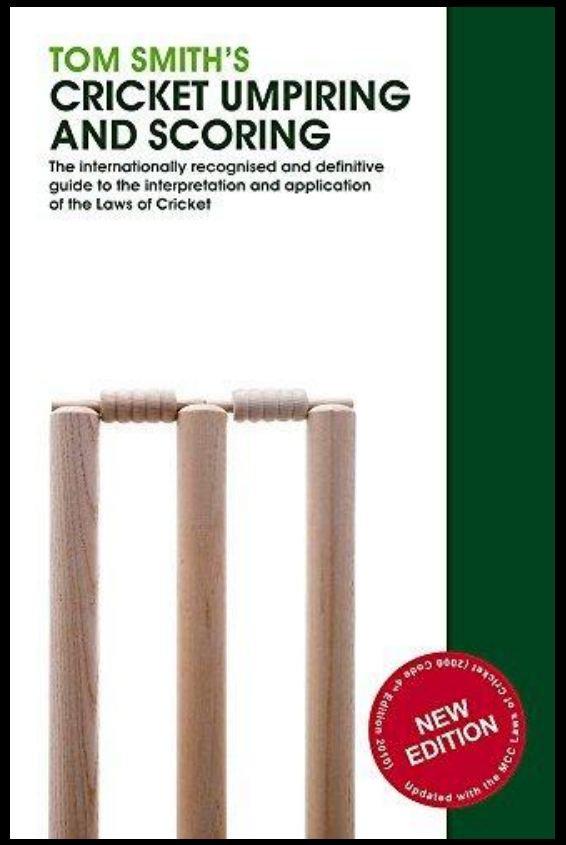
- Know when the LBW can be applied for batter when hitting and not hitting the ball
- Be able to judge whether a ball is out using the LBW law in a game of cricket
- Have better knowledge when it comes to looking at a balls path (Hawk Eye)

WHAT IS THE LBW RULE?

Activity:

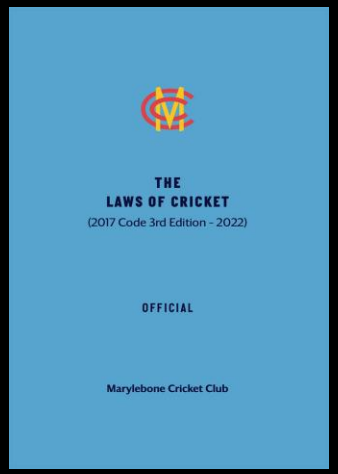
- In groups, find the definition of the LBW rule in one of the books I have handed out

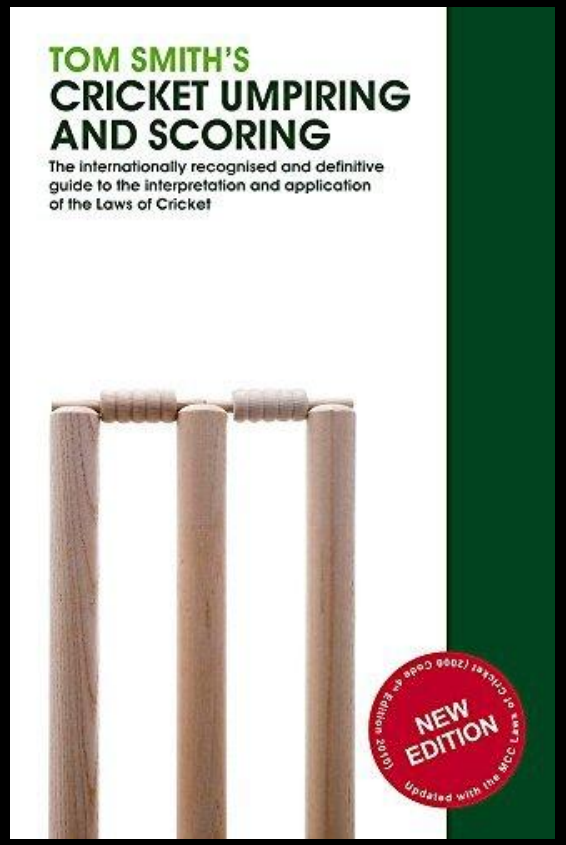




WHAT IS THE LBW RULE?

- If you're not playing a shot, it can hit you anywhere on the pad, can pitch anywhere in line with the stumps or on the off side, but would need to be going to hit the stumps, it's **out**
- If you are playing a shot, it's got to hit you in front of the stumps. if it hits the batter outside off stump and would've hit the stumps, it's **not out**





THE LBW CHECKLIST

1. Was it a no-ball?
2. Where has it pitched?
3. Has it hit the batter before it's hit their bat?
4. Were they trying to play a shot?
5. Would the ball have hit the stumps?

HAWKEYE / DRS

Ball-tracking technology

- Hawk-Eye is a ball-tracking technology used in cricket to visually track the sequence of the ball and provide a profile of its statistically most likely path on the pitch

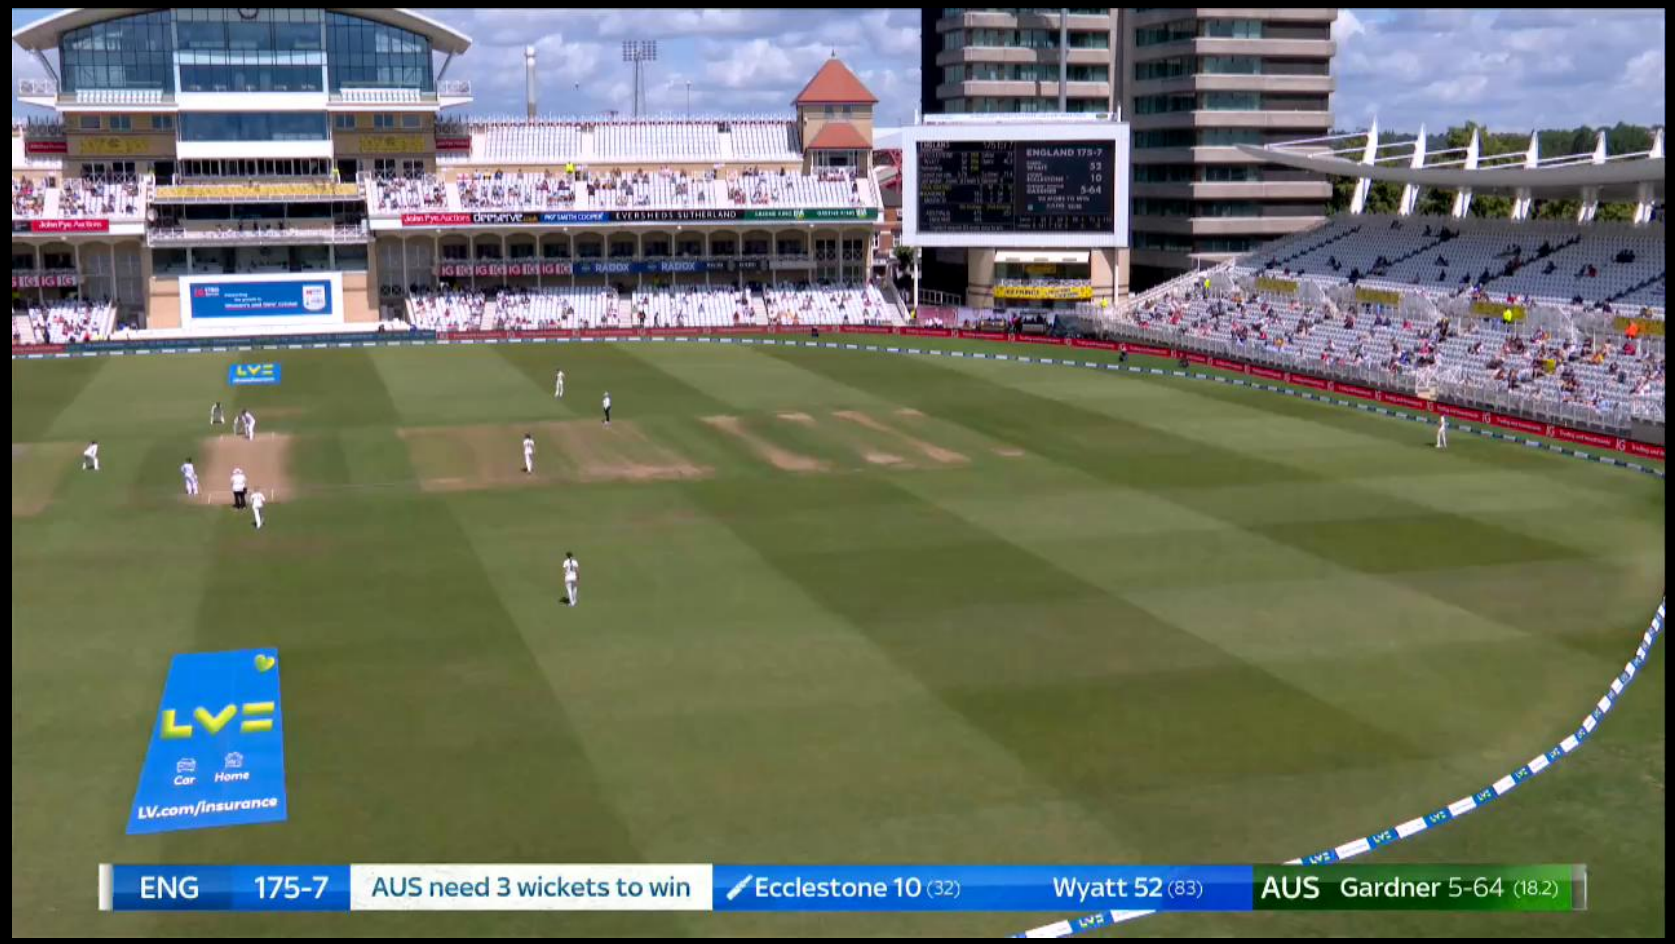
WHAT DID THE BALL IMPACT FIRST?

_____

WHAT DID THE BALL IMPACT FIRST?

WHAT DID THE BALL IMPACT FIRST?

WHAT DID THE BALL IMPACT FIRST?



WOULD THE BALL HAVE GONE ON TO HIT THE WICKET?

_____

WOULD IT HAVE HIT THE WICKET?

WOULD IT HAVE HIT THE WICKET?

WOULD IT HAVE HIT THE WICKET?

'UMPIRES CALL' AND DRS

Umpire's call refers to the original decision made by an on-field official and is used in scenarios where no conclusive outcome is reached by technology.

If the umpire gave the decision as out and the technology could not definitively prove or disprove that, the decision would remain out.

If the on-field officials opted not to give the decision as out and the review from the technology was inconclusive, the decision would remain not out.

Umpire's call is also used to help determine lbw decisions where the impact made with the batter is more than 30cm away from the stumps.

KAHOOT!

WHERE DID THE BALL PITCH? (CTD)

- Are there any marks on the pitch to give you some clues?
- Groundsmen's opinion

TO SUMMARISE:

- It’s **OUT** if you're not playing a shot, hit you anywhere on the pad, pitches anywhere in line with the stumps or on the off side, and is going to go on and hit the stumps
- It’s **NOT OUT** if you are playing a shot, and it's hit you in front of the stumps. if it hits the batter outside off stump and would've gone onto hit the stumps

ANY QUESTIONS?
