Basic Digital Skills

Digital safety where safety is the number one priority. Stay safe online and safeguard your social life.

Overview

Digital safety is very important in being safe online. Never should you share passwords or bank details with people you are unsure with or stranger you don't know.

Summary

Safety	**Social media** Being safe whilst using social media is important to safeguard your privacy and pictures. **Passwords** People can steal passwords, and they can use these to access your most precious details.
Websites	**Websites with URL** You should make sure to use URL safely with a Internet safety app or software. **Malware** Some websites have malware that downloads virus, placed by dangerous people. Links can have viruses put in by dangerous people to take bank details or any ID details.
Cyber Safety	**Messages** Messages that are written online can cause alot of damage to a person mentally. Never share messages online that can be used wrongfully by others. Even writing things that can hurt, can be manipulated. **Pictures** People can use pictures to change the way the picture shows and many can manipulate it. One should make sure not to post online, keep it in a secure cloud app or separately in a safe place. Once they are shared it can be spread.
