In this section for a student to do well, they needed to do in-text referencing from credible and relevant diversity of sources. Where possible one will be expected to critically appraise the literature engaged. Lastly one is expected to apply appropriate referencing conventions.This section was poorly done as there was no in-text referencing .	2.5

Feedback	**Mark**
To do well in this section one needed to demonstrate cognitive and intellectual skills by critical analysing and evaluating different technologies and methods used in practical work. There was also a need to answer the why, how and when, questions so as to give justification for arguments and judgements made through out the whole assignment.Could have focused on more critical analysis and justification on technology used.	11.4

Practical Application Skills	40
Feedback	**Mark**
This section carried the most weight and for a group to excel they needed to provide evidence of the practical work done by using time stamped screenshots and narrative text to accompany the screenshots. It needed skill to know the screenshot to include as part of evidence and at the end it is actually the combination and quality of screenshots and the accompanying narrative texts that will convince the examiner of the extent of which the tasks given were executed. Fair Attempt although you did not capture some other important events.	21.2

To score high a student needed to ensure that the document is of high quality and professionally done. There	

should be a good flow of ideas, with evidence of proper use of the spelling and grammar tool and a complete and neat presentation of work. You could have included in-text referencing.From Your Screenshots your team did not seem to be functioning well as there were different no collaboration	6.4
