1.Engagement with Literature Skills				
Introduction	/5	/5	/5	4 /5
Literature Review	/20	/35	/20	11 /15

Comments:
Good level of detail in the introduction. There's no need to go into such detail about what the lit review will cover; better to just get straight into it. It would be useful to see summary tables for comparisons. A good lit review but it can be difficult to make comparisons of technologies.

2. Knowledge and Understanding Skills				
Methodology	/5	/5	/5	3 /5
Survey Design	/15	-	-	-
Requirements/Design	-	-	-	5 /5

Comments:
Sensible methodologies although no consideration of ethics, reliability, validity & generalisability. Too long. Good use of a survey to elicit requirements, but it would have been useful to see some demographics on the respondants. Very good analysis.

3. Cognitive and Intellectual Skills				
Results & Discussions	/25	/25	/25	17 /25
Conclusions and Recommendations	/10	/10	/10	7 /10

Comments:
Detailed analysis has been carried out although this is discussed elsewhere. Conclusions and recommendations are sound.

4. Practical Skills				
Development	-	-	-	10 /15
Experimental Design	-	-	/15	-

Comments:
Good set of requirements.
Solid development process, although I'd prefer to see more wireframes for other page styles.
Would also like to see the structure of the back end database.

5. Transferable Skills for Life and Professional Practice				
Reflection	/10	/10	/10	6 /10
Quality of Report	/10	/10	/10	7 /10
Comments: Contents would be better as a standard table of contents rather than chapter headings alone. No table of figures. You don't need so many quotes – you could still reference the text without them. Reasonable reflection, although some thoughts on the project and how it relates to other modules would be good. More figures are needed to display the completed site.
