

RESEARCH METHODS II

Assessment 2 Discussion: Quantitative Report

Dr Kate Williams

Research Methods II: Assessment Gantt Chart

This can also be found in the 'Module Information' tile on the Module Moodle page

Assessment 2: Quantitative report

- A *quantitative* research report that makes up 40% of your overall mark for this module.
- In groups of approx. 6 people (see groupings in Microsoft Teams) you will design a small experimental research study and use the qualtrics platform to collect data from each other in order to answer a research question and write up a report.
- You will need to assign a lead for your group
 - This person will need to be someone organised and access to the qualtrics platform for the group will go through their account.
- You have the opportunity to be somewhat creative with the design of your research study, but it should follow the guidance set out on the proforma in order to meet the learning outcomes.

Assessment 2: Quantitative report

•In groups:

- Identify a clear and logical hypothesis, study design, and appropriate measures.
- Write and submit an ethics application to the SREC.
- Gather materials and create the study using the Qualtrics platform
- Each of you **must** contribute to data collection.

•Individually:

- Download the data from the qualtrics platform.
- Analyse your study data using an appropriate analysis and write up your report.
- The analysis should clearly incorporate all variables analysed, and the key SPSS output must be pasted into the appendix.

Assessment 2: Quantitative report

- The word count limit for the final report is 2,000 words and must follow the standard APA report structure for Psychology:
 - Abstract
 - Introduction
 - Methods (Participants/Design/Materials/Procedure)
 - Results
 - Discussion
 - Reference List (in-text citations and the full reference list must adhere to APA conventions)
 - Appendices

Run through key documents on Moodle and Microsoft Teams
