Environment Design Borrowers Presentation

GRADEMARK REPORT

FINAL GRADE

71 / 100

GENERAL COMMENTS

1. Engagement with Literature Skills (66%)

Research has been evidenced in the presented work, with citations used in the slides – this is always good to see.

A bibliography using IEEE format has been included in the submitted work.

2. Knowledge and Understanding Skills (67%)

A good understanding of the UV process (and transferrable skills between Blender and Maya) has been presented in the work.

The export process from Blender to Unreal has been documented and articulated well.

3. Cognitive and Intellectual Skills (66%)

Evaluation of project ideas is evidenced in the presentation, with scope and potential limitations on knowledge or execution of ideas is mentioned. This is fair – it is a first year assignment, and this shows an ability to think critically about what to produce for assessment work.

4. Practical Application Skills (80%)

The idea of the miniature world with oversized props (e.g. the Borrowers) is a novel idea and an original take on the

assignment brief. Paper clips on the washing line is a nice detail.

Practice models have been created as part of the project process, which is good to see. It is always good to learn by doing.

A good amount of effort has been made in setting up the scene (including HDRI, depth of field and lighting). These are all vital parts of environment design and it is good to see this being focused upon.

The final rendered scene is a very good example of work for this assignment – well done. You should definitely consider using this as a piece of work in your showreel and portfolio!

5. Transferable Skills for Life and Professional Practice (68%)

A good summary and introduction is made in the presentation.

All elements of the assessment have been completed and submitted by the deadline date specified and a 10 minute presentation has been successfully delivered.
