

MARKING CRITERIA and STUDENT FEEDBACK

This section details the assessment criteria. The *extent* to which these are demonstrated by you determines your mark. The marks available for each criterion are shown. Lecturers will use the space provided to comment on the achievement of the task(s), including those areas in which you have performed well and areas that would benefit from development/improvement.

Common Assessment Criteria Applied	Marks Available	Marks Awarded
1. Engagement with Literature Skills		
You have identified that researching and referencing is important to your studies and you have demonstrated this appropriately. Just one point of note - you are studying many modules this year, more evidence would have shown you have utilised the skills learned	20	16
2. Knowledge and Understanding Skills		
There is some argument that the supplied evidence does show you have a grasp on the needs of a "Typical" student. But you are lacking supporting material to truly demonstrate your understanding	20	8
3. Cognitive and Intellectual Skills		
Although you have the grounding to become a "better" student, you should have reflected on the needs of the coursework brief and what needs to be done in order to apply those "research" and practical skills - definitely a missed opportunity	20	11
4. Practical Application Skills		
Simple - lack of supporting evidence is obvious (see coursework brief). Do not forget, that this is all about you as a student from when the module started - from which you would have a large amount of evidence. Simple collation of such evidence would have provided a better reflection i.e. before - that is your L3 skills and how you progressed to L4 (and beyond)	30	14
5. Transferable Skills for Life and Professional Practice		
Obviously, elements of teaching are obvious and you have applied those skills to produce a well presented report. For completeness, you should have listed the various illustrations	20	8
