DS 1 Assignment

My Screenshots/Photos

Screenshot/Photo 1

I use my tv to watch Netflix, Youtube and other entertaining programs in my free time.

I feel confident watching online content.

I want to learn more about the differences features and apps available on my smart tv.

These skills help me listen to good music and watch nice movies when I have free time

Screenshot/Photo 2

I use city mapper as GPS to plan my journeys, find routes, and check public transport times.

I feel confident choosing the best route as if I should take the bus or train because of busy times and how long I will take to arrive.

I want to learn how to use more features of city mapper when there are disruptions

These skills help me travel all around London independently and save time.

Screenshot/Photo 3

I use my bank card/ Apple pay to pay for public transportation / buy meals and pay for my everyday expenses.

I feel confident using my bank card and contactless payment.

I want to learn more about online banking and how to manage my money digitally.

These skills make my life easier and manage my money.

Screenshot/Photo 4

I use my mobile phone all the time to do everything. Send messages/make calls/ use social media

I feel confident using my phone communication with my friends/ taking pictures/ posting on social media and i would like to improve using certain apps to study or read online books.

These skills are important because they help me communicate with people (like my family which are far away) and help me stay tuned, learn new things etc.

Screenshot/Photo 5

I use my computer to work, write assignments, search for information, and access online resources.

I feel confident doing basic tasks and working

And I would like to improve using Microsoft Word and PowerPoint to do my assignments.

These skills are important because they help me with my studies and will prepare for my future job because on these days you have to be good at technology because you use them for everything.

My Short Reflection

I use digital tools to do everything; it makes my life much easier.

I feel confident using technology to find information and buy things too.

I want to improve my computer skills because i know they will be useful for my studies and a future job.

I often use Instagram to see my friend's life, what they are up to, what has been going on, to take pictures of myself and posting to. And I also use what's app all the time to talk to my friends, make video calls to see my family which are in another country.

I sometimes feel nervous when i must use it for something new, as using PowerPoint and Microsoft work to do my assignments.

I hope this module will help me become more confident using digital skills.

Digital skills are important for me because technology is part of everyday life and can help me in my future.
