

ScoutsCymru have recently launched our newest provision in 35 years, specifically, for Early Years children, aged 4-6. Our aim is to provide Skills for Life in a non-formal education format. In one hour sessions we cram in adventure, fun, games, crafting and badges thanks to our incredible team of volunteers Wales wide.

We created our tailor-made program in consultation with over 400 experts from around the UK. We provide a unique challenge for young people, helping their development, confidence and social skills in a variety of settings around our core badge award framework. We incorporate play with learning about vital things such as the outdoors and sustainability that they can then take forward as they grow.

Here in Wales we are rapidly expanding our Squirrel provision and are proud to be working with UWTSD to help promote and expand our offering.
