Web Page Evaluation

Web Page Link - https://swansea.art/privateprofile/max-hughes/

Please see the screenshot of my web page for the Swansea.art website above. I am not completely happy with the end result because only my artist statement is included. I did send images from my own art practice to be included, but for some reason they haven't been added to my profile page, which has made it not that effective in showcasing my art practice. I followed very specific submission guidelines for images to be uploaded to the website, but maybe I missed something. If this is the case then I need to pay closer attention in future. You can see the images I wanted included below.

I feel the images I selected from my own art practice would have been effective in reflecting my artist statement, which you can see in the above screenshot of my web profile. Since we were only provided the links to our web profiles the day of the deadline, I have not been able to get this issue resolved, but I have made efforts to do so by emailing and asking what the issue is. In conclusion, I would say the web profile will not be effective until I am able to resolve the before mentioned issue.
