	I am glad I took this course as my last one. It took me a very long time to get confident handling GPS, compass and clinometre. Then the conversion of the data into results was yet another challenge. Again, for building up confidence it took me several approaches. What we never discussed was, how one starts to make sense of rising and setting stars (information obtained by consulting Stellarium) and how to go about interpreting what it could mean for a certain culture/ group of people around same location at a certain period of time. There are no books offering insight into, whether e.g. the Celts attributed meaning to rising and setting of Aldebaran. Nor are there books which help to assess whether throughout the medieval period (spanning from 500-1400) the clergy e.g. at Basle used astronomical observation or whether greek/roman mythology of the sky was known to the clergy or other ruling classes. I would have wished to have understood how other students and especially Master students go about dismanteling this last process step within fieldwork and literature research in order to bring earth and sky together and therefore being able to write up a coherent project research report. It would be great having insight into how lead learners solve issues mentioned above.
	I found this module to be super inspiring, and with every session i learnt new concepts. I wish the module could have gone on for longer, i literally don't look at buildings or structures the way i used to before the module, because all i think about now is: How is this structure orientated? :-) All the tutors are so inspiring, encouraging and supportive. I feel like by taking the module i have been introduced to new concepts i didn't really know existed, and it has broadened my horizons. Prior to taking the module, i didn't feel confident using astronomy software or even my compass, but through listening to some of the things my peers were doing through our weekly tasks, i felt much more encouraged to try and explore new things, and as a result i have learnt so much. I still have a long way to go in improving my essay writing and expressing myself in a more succinct way through writing, but i am hoping this will improve with practice. Thank you all for such a lovely learning experience!
