Non-submission for a section will result in a mark of 0 for that section.

No need for an abstract with something this short. Just treat it as an essay and put a good introduction at the start. Remember to put the name of the author in the main body of the text close to the reference number, e.g. "Baravalle, Lopez & Lee [1] say state that..." Always label your diagrams/figures and refer to them in the main text.
