To score high marks one needed to demonstrate systematic understanding of various technologies that were installed or deployed during practical work. The strength of statements given, and critical understanding of concepts covered under observation task contributed to the score on this section. Marks for the structure of the document were also considered in this section. You could have given more illustrations in AD and DHCP and compared list of terminologies in line other Oss. Looks like you did not have much time to do Observational tasks	5.2

Feedback	Mark
To do well in this section one needed to demonstrate cognitive and intellectual skills by critical analysing and evaluating different technologies and methods used in practical work. There was also a need to answer the why, how and when, questions so as to give justification for arguments and judgements made through out the whole assignment. Practical tasks needed adequate annotation so as to justify the configurations. Given a max of 250 words you could have discussed more on reflection.	8.3

Practical Application Skills	40
Feedback	Mark
This section carried the most weight and for a group to excel they needed to provide evidence of the practical work done by using time stamped screenshots and narrative text to accompany the screenshots. It needed skill to know the screenshot to include as part of evidence and at the end it is actually the combination and quality of screenshots and the accompanying narrative texts that will convince the examiner of the extent of which the tasks given were executed. You did a good job although your screenshots needed a brief narrative in context to avoid creating a user manual.	33.6
