

ALBAHERITAGE

A DIGITAL PLATFORM FOR EXPLORING AND
MANAGING ALBANIAN CULTURAL HERITAGE

INTRODUCTION

AlbaHeritage is a web-based platform that centralises Albania’s cultural heritage into a single digital system. It combines a public website with a secure administration dashboard, allowing users to explore heritage sites while enabling administrators to efficiently manage and update cultural information.

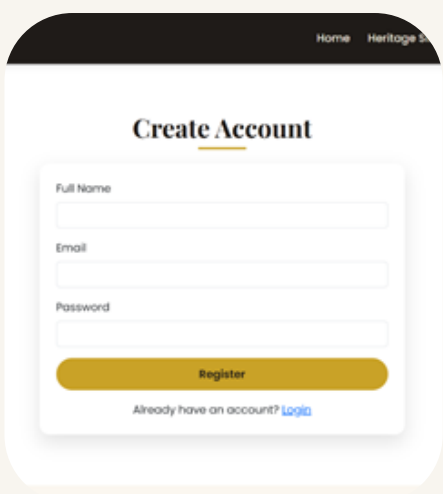

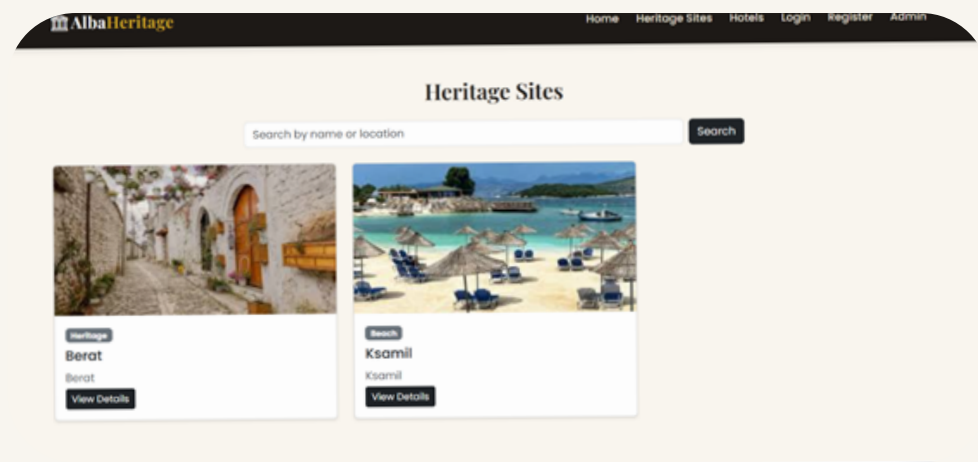

PROBLEM STATEMENT

Albania lacks a centralised platform for managing and promoting its cultural heritage. AlbaHeritage solves this by bringing heritage information together in one modern, user-friendly web application.

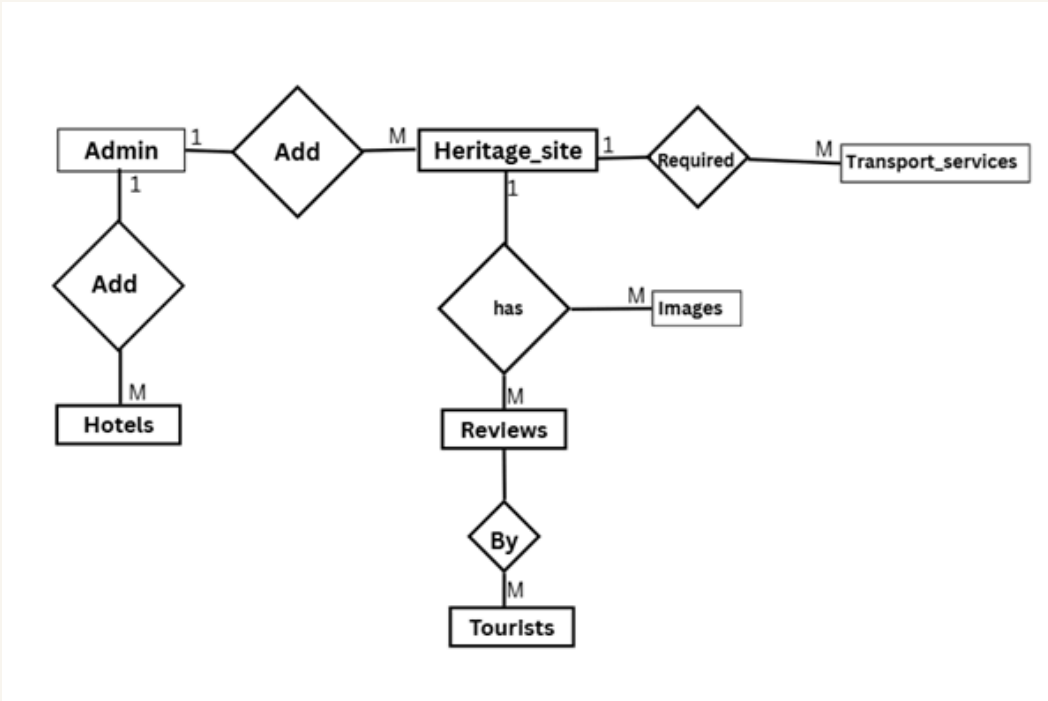

OBJECTIVES

- Centralise Albanian cultural heritage information.
- Improve accessibility and user experience.
- Promote tourism through a modern web platform.
- Provide secure content management.
- Develop a responsive and scalable system.

ER DIAGRAM

Technologies Used

PROJECT OUTCOMES

- ✓ Centralised cultural heritage information
- ✓ Responsive and user-friendly website
- ✓ Secure administration dashboard
- ✓ Improved accessibility and tourism support
- ✓ Scalable full-stack web application

FUTURE ENHANCEMENTS

- Interactive Google Maps integration
- AI-powered heritage recommendations
- Mobile application
- 360° virtual tours
- Multilingual support
- Visitor analytics dashboard

PROJECT INNOVATION

- Centralised heritage information
- Interactive digital exploration
- Government content management
- Modern responsive web platform
- Scalable database architecture
- Improved accessibility for visitors
