Topics to Cover

- Apple School Manager
- Device Assignment
- Automated Device Enrolment
- Jamf Pro
- Object PreStage
- Application & Profile Deployment

Apple School Manager

- Devices purchased from approved resellers automatically added to our ASM account
- Devices purchased outside of approved resellers (Dyfed Telecom...) need manually adding
- Devices assigned to an MDM Server
- Automated Device Enrolment takes over

Device Assignment

- Device assignments can only be done by Device Administrators
- Assignments can be done by selecting a device, group of devices, or an entire order, and editing their MDM server assignment
- Assigned devices will then proceed through the Automated Device Enrolment process, previously known as Device Enrolment Program

Automated Device Enrolment

- Device will check in with Apple, told to speak to an MDM Server
- Device will contact the MDM server and ask what it's supposed to do
- Jamf Pro takes over from Apple and provides setup instructions to the device

Jamf Pro

Jamf Pro is a Mobile Device Management (MDM) solution.

- Device Management
- App Lifecycle Management
- Inventory Management
- Hair Loss

Object PreStage

- PreStage provides the device initial instructions for ADE
- Can provide some basic settings for setup
- Really important part of Jamf - We base Smart Groups off these PreStage's

Application & Profile Deployment

- Used to deploy settings
- Used to deploy applications
- Provides a Self Service application
- Keeps applications up-to-date
