Module Learning Outcomes (from module syllabus)

- Demonstrate self-reflective and reflexive practices within the context of counselling skills, drawing upon ethical and principal values within the counselling tradition.
- Employ humanistic – person-centred counselling skills; beginning to develop an awareness of the significance of relational depth within reflexive practices.
- Critically demonstrate reflective/reflexive practices that contribute and support professional practices and growth such as reflective/reflexive writing and personal development
- Take responsibility for their own learning and skill development, including effective personal planning, self-reflection, and project management skills.

TASK DESCRIPTION

50% Coursework: Reflective piece (2,500 words)

A 2,500-word reflective commentary on your professional and personal development throughout this module, linking theory and practice.

You can use any one of the reflective modules we consider and work with throughout the module as a framework for your reflections.

Your reflections can focus on any aspect of the module. For example: Your personal development; your enhanced reflexivity; any particular lesson(s) or activity(ies) which you found particularly insightful; the implications and reflections upon your triad work or the experience/impact of the counselling session you recorded for assessment.

This written piece will allow you to reflect upon and evidence your reflective journey and your professional and personal development. Within this, you will need to demonstrate your resultant increased self-awareness and the growing ability to link theory and practice.

As this is a reflective piece, it can be written in the first person, although the usual academic conventions appropriate at Level Six, apply. You therefore need to ensure that your work complies with academic conventions.

GUIDANCE FOR STUDENTS IN THE COMPLETION OF TASKS

NOTE: The guidance offered below is linked to the five generic assessment criteria overleaf.

1. Engagement with Literature Skills

Your work must be informed and supported by scholarly material that is *relevant* to and *focused* on the task(s) set; you should make use of scholarly reviews and primary sources, where appropriate (for example, refereed research articles and/or original materials appropriate to the discipline). You should provide evidence that you have accessed a wide *range* of sources, which may be academic, governmental and industrial; these sources may include academic journal articles, textbooks, current news articles, organisational documents, and websites. You should consider the *credibility* of your sources; academic journals are normally highly credible sources while websites require careful consideration/selection and should be used sparingly. Any sources you use should be current and up-to-date, mostly published within the last five years or so, though seminal/important works in the field may be older. You must provide *evidence* of your research/own reading throughout your work, using a suitable referencing system, including in-text citations in the main body of your work and a reference list at the end of your work.

Guidance specific to this assessment:

Whilst this is a reflective commentary, you are expected to provide appropriate citations and references to appropriate literature to support your reflections and critiques. Citations and referencing must be in current APA style.

Evidence that you have accessed a wide range of sources.

2. Knowledge and Understanding Skills

At level 6, you should be able to demonstrate coherent and detailed knowledge and a systematic understanding of the subject area, at least some of which is informed by the latest research and/or advanced scholarship within the discipline. You should be aware of the uncertainty, ambiguity and limits of knowledge. Your work must demonstrate the growing extent of your knowledge and systematic understanding of concepts and underlying principles associated with the subject area. *Knowledge* relates to the facts, information and skills you have acquired through your learning. You demonstrate your *understanding* by interpreting the meaning of the facts and information (knowledge). This means that you need to select and include in your work the concepts, techniques, models, theories, etc. appropriate to the task(s) set. You should be able to explain the theories, concepts, etc. meaningfully to show your understanding. Your mark/grade will also depend upon the *extent* to which you demonstrate your knowledge and understanding; ideally each should be complete and detailed, with comprehensive coverage.

Guidance specific to this assessment:

You will need to consider how you can best evidence the increased knowledge, self-awareness and reflexive skills you have acquired.

The theories behind reflective thought processes and writing are complex, and there are many different reflective models. Resultantly, an awareness of the similarities and differences between some of these models should help you become familiar with the core concept of reflexivity, and assist you in choosing a model which fits with your way of reflecting and your experience.

Some models to consider are:

Gibbs Model of Reflection

Gibbs G. (1988). Gibbs Reflective Framework: Learning by Doing: A guide to teaching and learning methods. Further Education Unit. Oxford Polytechnic: Oxford.

The 'So What' Reflexive Model

Driscoll J. (1994). *The 'so what' Reflexive Model. Reflective practice for practise. Senior Nurse, 13, 47 -50.*

Schon's Model of 'Reflection in' and 'Reflection on' Action.

Schon, D. A. (1991). *The reflective practitioner: How professionals think in action. Ashgate Publishing.*

These and others will be considered and worked with as part of the module.

3. Cognitive and Intellectual Skills

You should be able to: critically evaluate evidence, arguments, assumptions, abstract concepts and data some of which are at the forefront of a discipline (and that may be incomplete) to devise and sustain arguments, to make judgements and/or solve problems; describe and comment upon particular aspects of current research, or equivalent advanced scholarship, in the discipline Your work must contain evidence of logical, analytical thinking, evaluation and synthesis. For example, to examine and break information down into parts, make inferences, compile, compare and contrast information. This means not just describing what! But also justifying: Why? How? When? Who? Where? At what cost? At all times, you must provide justification for your arguments and judgements. Evidence that you have reflected upon the ideas of others within the subject area is crucial to you providing a reasoned and informed debate within your work. Furthermore, you should provide evidence that you are able to make sound judgements and convincing arguments using data and concepts. Sound, valid conclusions are necessary and must be derived from the content of your work. Where relevant, alternative solutions and recommendations may be proposed.

Guidance specific to this assessment:

Evidence strong reflective, logical, analytical thinking, evaluation and synthesis skills

As mentioned earlier, whilst this is a reflective piece, it is also an academic assignment, so remember to support the points you make, provide justification for your arguments/judgements and submit an academically sound essay.

4. Practical Skills

At level 6, you should be able to apply the methods and techniques that you have learned to review, consolidate, extend and apply your knowledge and understanding, and to initiate and carry out projects. You will deploy accurately established techniques of analysis and enquiry relevant to the discipline, and apply them in complex and unpredictable contexts, to devise and sustain arguments and/or to solve problems. You should be able to frame appropriate questions to achieve a solution - or identify a range of solutions. You should be able to demonstrate how the subject-related concepts and ideas relate to real world situations and/or a particular context. How do they work in practice? You will deploy models, methods, techniques, and/or theories, in that context or circumstances, to assess current situations, perhaps to formulate plans or solutions to solve problems, or to create artefacts, some of which may be innovative and creative. This is likely to involve, for instance, the use of real-world artefacts, examples and cases, the application of a model within an organisation and/or benchmarking one theory or organisation against others based on stated criteria. You should show awareness of the limitations of concepts and theories when applied in particular contexts.

Guidance specific to this assessment:

This assignment provides an opportunity to demonstrate subject-related concepts and ideas and relate these to real world experiences and situations.

Evidence how you have a broad understanding of some of the more well-known reflexive models and can explain the reasons why you have chosen one particular model to frame this assignment.

5. Transferable Skills for Life and Professional Practice

Your work must provide evidence of the qualities and transferable skills necessary for graduate-level employment requiring the exercise of initiative and personal responsibility and decision-making in complex and unpredictable circumstances. This includes demonstrating: the learning ability for professional development to advance existing skills and acquire new competences of a professional nature that will enable you to assume significant responsibility within organisations; that you can initiate and complete tasks and procedures, whether individually and/or collaboratively; that you can use appropriate media to effectively communicate information, arguments and analysis in a variety of forms to specialist and non-specialist audiences; fluency of expression; clarity and effectiveness in presentation and organisation. Work should be coherent and well-structured in presentation and organisation.

Guidance specific to this assessment:

Transferable skills are evidenced within the ability to reflect upon life, work and practice.

Endeavour to give your assignment a strong structure and organisation, concentrating on fluency of expression, clarity and effective, clear communication.

Further detailed information can be found on the Moodle page and please also ensure that you carefully consider the following Generic Assessment Criteria to assist you further in preparing for this skills session and recording.

STUDENT FEEDBACK FORM

This section details the *extent* to which the assessment criteria are demonstrated by you, which in turn determines your mark. The marks available for each category of skill are shown. Lecturers will use the space provided to comment on the achievement of the task(s), including those areas in which you have performed well and areas that would benefit from development/improvement.

GENERIC ASSESSMENT CRITERIA

Level 6

In accordance with the Framework for Higher Education Qualifications, at the end of Level 6 students should have coherent and detailed knowledge and a systematic understanding of their subject area, at least some of which is informed by the latest research and/or advanced scholarship within the discipline. They will be able to accurately deploy established techniques of analysis and enquiry within a discipline, using their conceptual understanding to devise and sustain arguments and/or to solve problems. They should be aware of the uncertainty, ambiguity and limits of knowledge. They should be able to critically evaluate evidence, arguments, assumptions, abstract concepts and data (that may be incomplete), to make judgements, and to frame appropriate questions to achieve a solution - or identify a range of solutions. They will apply the methods and techniques that they have learned to review, consolidate, extend and apply their knowledge and understanding, and to initiate and carry out projects. They will have the ability to manage their own learning, and to make use of scholarly reviews and primary sources (for example, refereed research articles and/or original materials appropriate to the discipline). They will demonstrate the qualities and transferable skills necessary for employment requiring: the exercise of initiative and personal responsibility; decision-making in complex and unpredictable contexts; the learning ability needed to undertake appropriate further training of a professional or equivalent nature.
