Introduction

This presentation concerns developing healthcare and social support for a particular community.

The development of a community is a challenging process; but this is a primary need of a particular community.

For this presentation the chosen community is in WEMBLEY, BRENT. Alongside, it delivers the progress of signifying community engagement and the emergence of Healthcare needs.

The aim of this presentation is to discuss the possible existence conditions of health risks, demographics, and ways of communication that reduce Healthcare problems within the healthcare service and community groups.

Introduction

Demographic of the area of Wembley, Brent

Population:

The usual demographic of this community for the median age of people is 35 years old in Wembley.

Around 19.9% of the population are 0 to 14-year-old children. Children are the core variant for calculating the population there.

Those who are the age of 65 years old comprised almost 13.0% of the population.

50.2% of the population there are 15 years old.

Around 50.2% are married (Brown, Smith, and Assaker, 2016).

However, all of them are not married rather 9.5% were separated or divorced.

Legislation and policy impact the support and growth of a community

The Localism Act 2011

This act provides the rights for communities from the community late housing in the context of the government's recent growth.

The Self-Build and Custom Housebuilding Act 2015:

This act has provided the service of plot land that is a custom bill project or self-built property (Hochberg et al., 2012).

Legislation and policy impact the support and growth of a community

- The Neighbourhood Planning Act 2017: This act is more Western than the plan of neighbourhood development that has been approved by a local referendum. the formal utilization of this act is intangible somewhere (Livingston et al., 2020).
- The Housing and Regeneration Act 2008: The registration process has been approved by the Greater London Authority which is particularly working for community housing groups (Moher et al., 2015).

Barriers / obstacles to community development

www.gettyimages.no. (n.d.). Wembley Park Station Photos and Premium High Res Pictures - Getty Images

- **High level of transience:** It happens when the Cohesion of the community is absent and a high level of fragmentation has been found there (Reynolds, Pilling, and Marteau, 2018).
- **Racism:** community humiliation and bowling Mein create conflicting conversations among them and it raises the tension for community development (Smith et al., 2022).
- **Language barriers:** When language is a barrier, it provides mutual suspicion, lack of interaction, filling of isolation, and Cohesion among different groups of people that can engage the possession of Cohesion in the community (Webber, 2015).
- **Community space in terms of Under-utilization :** Community development is the accessible and rated scope of producing key resources among the participants of intercultural communication.

Recommendations

- Providing health care to a particular community is the greatest aspect of providing the general issues and maintenance
- In this regard, Wembley has started a cultural question program to generate the criteria for delivery terms and conditions
- For building community development programs, they can build free accessed sports to provide the power to change human life into a better condition.
- to keep regular Sporting activities to improve their mental and physical well-being.
- a wide social network for improving the rise of neighbouring, plant some new skills, thought, and skill of improving care life perspective in terms of everyday life.

Conclusion

This presentation has engaged various legislative concern for the purpose of improving community.

Wembley has got the scope to add charitable foundation for developing the community with recreational aspects of the physical and mental health.
