

Data Mining – Dataset Presentation			
Student	Haoyi Sun		
Dataset	Adult Income Dataset from UCI.		
Marking			
Presentation/Slides (Clarity, readability, flow, accuracy, completeness, performance) Good slides, presented without reading from notes. Nice use of Tableau Vizes.			(10 marks) 6
Dataset Description (Where did the data come from? What does the data describe? Is the sample large enough? What data formats and types are involved?) Good dataset with plenty of records. A bit focussed on a single classification output			(50 marks) 33
Dataset Suitability (What features of the dataset lend themselves to data mining? Has it been mined previously? Why does the student feel that they have the contextual background to work with this data?) Well-studied dataset with a literature to back it up.			(20 marks) 14
Objectives (What does the student plan to investigate/expect to find? Are these SMART?) Interesting set of questions technically described. Classification and association analyses suggested.			(20 marks) 13
General comments Some very interesting ideas. Confident answers to questions. Try speaking a little louder and interacting with the audience a bit more.
