

Abstract

Introduction:

There are statements that contain:

- 1) Research Problem,
- 2) Motivation / Need for this research
- 3) Shortcomings in literature

Objectives:

There are statements that contain:

- 1) Specific and measurable objectives,
- 2) Purpose of the study,
- 3) What is expected to be achieved

Importance of research:

There are statements that contain:

Scientific and Practical values in the completion of the objectives

Literature review:

- 1) Literature Review is Relevant and comprehensive.
- 2) Critically summarized.

Hypothesis / Research Question:

There are statements that contain:

- 1) Hypothesis / Research Question is logically verifiable using analytical or logical or statistical approaches
- 2) Hypothesis / Research Question is mapped with the objectives and research problems.

Research Design and Methodology:

Research methodology provided is Suitable and match given objectives

Procedural steps needed to achieve the objectives are described

Selected analytical or procedural techniques are Highly appropriate for the given problem.

Research Limitations:

There are statements that contain:

Impact or influence on the research study due to limitations in design is specified

Impact or influence on the research study due to the methodology is specified

Timeline:

Enough to complete all the objectives using Gantt chart

Expected findings:

Expected findings are consistent with the objectives

References:

All references are cited in the text.

References are from reliable sources (academically reputed sources: journals or conferences).

References are up-to-date (at least some papers are from last 3 years).

References are written in prescribed format.
