INSPIRE is launching its new on-line certificate on Sustainable Development and the Well-being of Future Generations.

The Well-being of Future Generations (Wales) Act of 2015 is the first of its kind in the World, where the Well-being of Future Generations is considered at the heart of Welsh Government decision making. In the Act, Sustainable Development means the process of improving the economic, social, environmental and cultural well-being of Wales by taking actions, aimed at achieving seven well-being goals.
