Remote Connect via Labstats

To use labstats on SoAC:

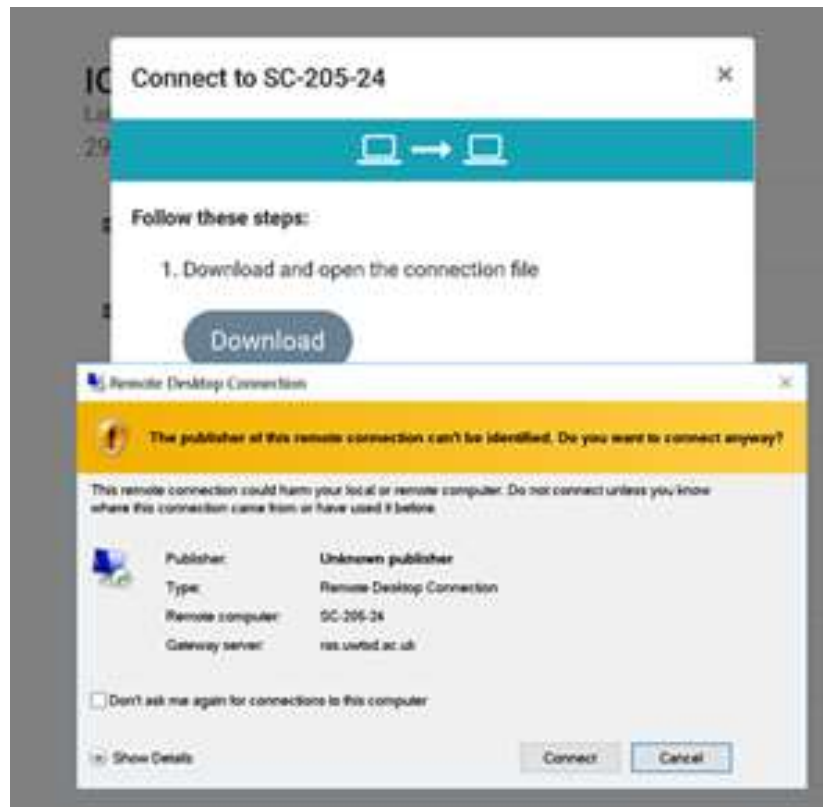

1. Go to <https://remotepc.uwtsd.ac.uk>
2. Login using your email address and university password for Moodle, email etc.
3. Find the IQ building picture, click on Dashboard
4. In the left-hand side of the window, browse to the lab you want, you should see the PCs in that lab being to populate the right-hand side content of the window.
5. Click on a PC and choose Connect

Dashboard_IQ

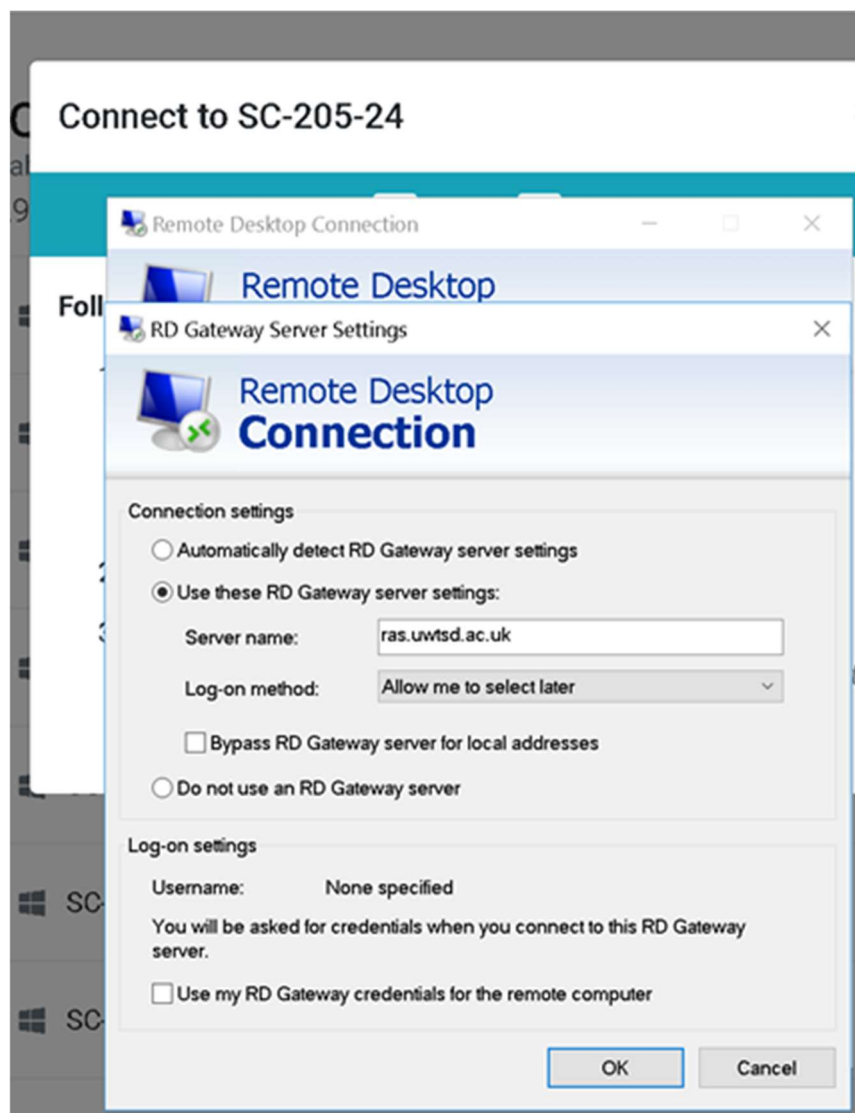

Computer Labs

- IQ 004
- IQ 006
- IQ 007 Tech Area
- IQ 011 Tech Area

SC-205-07	SC-205-07	Connect
SC-205-24	SC-205-24	Connect
SC-205-30	SC-205-30	Connect

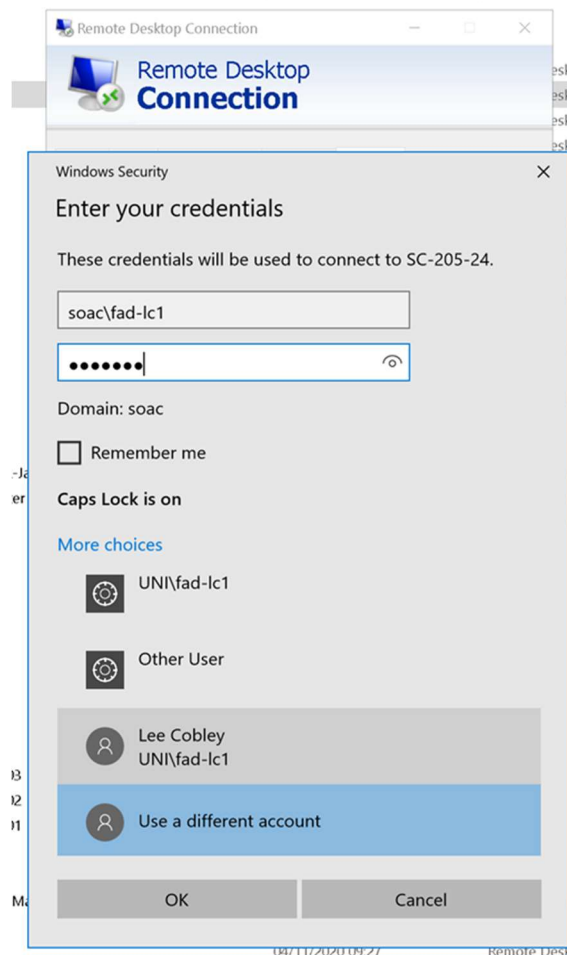

6. Click Download and then close the Remote Desktop Connection window that overlays this one (shown above). The RDP file we've just downloaded needs to be edited.
7. Go into your download folder and find the RDP file (in the instance above it is SC-205-24).
8. Right click the file and choose Edit.
9. Go to the advanced tab, click on the Settings button and make sure the options look like this: It is important that the Use my RD Gateway credentials for the remote computer is **checked off**

10. Click Ok and then Connect.
11. When prompted enter your uni email address and password again

12. You should now receive a MFA notification from Microsoft Authenticator on your mobile phone, approve this as you usually do.
13. Now you will be prompted again (at the SoAC RDP gateway) for your SoAC login details.
14. Click More Options, enter your SoAC username and password, it is important to let RDP know which domain you are accessing soac\ e.g:

15. Choose Ok Connect and Accept any further connection prompts.
16. You should now be logged into the SoAC system.
