

Common Assessment Criteria Applied	Marks Available	Marks Awarded
1. Engagement with Literature Skills		
No evidence of literature review related to the project., references to project background good however. Ok sources used within context of project but little referencing in document.	10	4
2. Knowledge and Understanding Skills		
Problem not really business/ commercially related, although clearly potentially commercial. The problem evaluation of the existing system is only lightly evaluated in places. Discussion of project outputs are a bit vague in places. Although limitations of the project and functions have been well identified, there are areas where the project aims could be clearer such as discussion of expected outputs.	20	14
3. Cognitive and Intellectual Skills		
Relationship between data base and interface have been discussed, however Project requirements clear with a good description of system tasks. No alternatives to design choices discussed.	20	13
4. Practical Application Skills		
Data described well, although reasons for choice of data could be better explained in places although data inputs shown in database and interface, input methods only lightly justified. Methods of access only lightly described in some places. Data validation showing how inputs are to be tested missing, no routines discussed as to how data will be validated. Good flowchart. Processes have been identified but could be better linked by a bit more explanation.	40	25
5. Transferable Skills for Life and Professional Practice		
Grammar- input not inputted, rest fine but layout headings don't contribute to the flow of the explanation.	10	8

Assignment Mark (Assessment marks are subject to ratification at the Exam Board. These comments and marks are to give feedback on module work and are for guidance only until they are confirmed.)	Late Submission Penalties (tick if appropriate)		64
	Up to four weeks late
