Engagement with Literature Skills	40
Feedback	Marks
In this section to do well, you need to do in-text referencing from credible, relevant and diverse academic and industry sources for Network Automation Frameworks, Tools, API Standards and Architecture, its security and compliance policies and various resources available. Where possible you will be expected to critically appraise and summarise the literature engaged and to apply appropriate referencing conventions. In-text citation not done. Academic credible literatures referred to the work. However, without in-text citation, it is difficult to follow up on what were used, how they were reviewed etc. At Level 5, it is very important to understand the importance of in-text citation and apply them. Due to lack of citation, the engagement with Literature is difficult to be associated.	15.4

Knowledge and Understanding Skills	30
Feedback	Mark
To score high marks you need to demonstrate systematic understanding of network automation frameworks, tools, standards, architecture and its importance. The strength of statements need to reflect clearly the underlying principles, and critical understanding of concepts with appropriate examples and adequate figures/ diagrams. Could have done much better. Started well by reflecting on your understanding about Network Programmability. However, more discussion around the frameworks, standards, tools and architecture is required. Need to demonstrate more systematic understanding. Python, Ruby are programming languages used for automation. However need to discuss about various tools used for automation, network configuration etc more in-detail. More reflection with examples could have added value.	19

Cognitive and Intellectual Skills	20
Feedback	Mark
To do well in this section you need to demonstrate cognitive and intellectual skills by critically analysing and evaluating Network Automation frameworks, tools, standards and architectures. There was also a need to address similar resources (where available, what is the cost, etc), with adequate arguments and judgements. Critical review on security, compliance policies and API security and privacy required. Good discussion around similar resources with reasonable judgements. Discussed on API security. However, more detailed analysis/ critical review on security, compliance policies could have added more value to your work.	12.3

Practical Application Skills	0
Feedback	Mark
Not Applicable	0

Transferable Skills for Life and Professional Practice	10
Feedback	Mark
To score high you need to ensure that the document is of high quality and professionally done. There should be a good flow of ideas, with evidence of proper use of the spelling and grammar tool and a complete and neat presentation of work. Marks for the structure of the document were also considered in this section. Formatting and numbering needs attention. Could have used tables/ figures to illustrate the differences and understanding of the concepts.	7.8
Overall Mark	55
