Report:

Introduction:

This report will delve into the methods of java script that I chose to use within my website and why I chose them.

Java script components use:

```
<html>
<head>
  <meta charset="utf-8" />
  <title>Homepage</title>
  <link href="Style.css" rel="stylesheet" type="text/css" />
  <script type="text/javascript">
    var imgtwo = new Image();
    imgtwo.src = "Face_20.jpg";
    var imgone = new Image();
    imgone.src = "Face_1.jpg";

    function changeimage(x,imagerequired)
    {
      x.src=imagerequired.src
    }

  </script>
</head>
<body>
  <div id="large_image_box">
  <div id="large_text_box"><h1>Hello, and welcome to the greatest website ever made. A website all about meeee!!!</h1></div>
</body>
</html>
```

This part of the code is to create a role-over-image.

This part of the code calls the role-over-image.

FINAL GRADE

20/100

GENERAL COMMENTS

Instructor

WEBSITE

Practical Application and Deployment (70)

Component 1 - Roll over image - god pretty much identical to what we did in class. You need to extend this and have multiple images etc to show you really understand the concepts involved. 8/20

Component 2 - Quotes - not working. However the code suggests that you have used an array and a random number which is good - I'm not entirely sure how it give you a whole number that's in range. 8/20

Component 3 - Can't find anything involving an HTML form?

(60 marks – broadly 20 per component)

- Overall integration of website – Pretty basic layout, several spelling mistakes, and also none of the images are not working (I don't think you've included them in your folder 4/10 (10 marks)

REPORT

Don't forget - you shouldn't use "I" in academic reports. Use the passive: eg "...methods of Javascript that were chosen to be used within the website"

I'm a bit surprised that this report is so short (only

half a page), did you run out of time?

Analysis (15) – Analysis of the technical development of your Javascript component

None provided?

Knowledge and Understanding of Subject (15) - Annotated code listing.

A bit limited, and only done for one component. 2/15

OVERALL MARK: 20%

This assignment does not have enough content on either coding or report.
