

Sustainability in the Early Years ECEY6005

Sarah Pugh

Student number: 2010926

A photograph of a wooden deck patio. In the center, there is a small round metal table with four matching chairs. To the left, a large black storage box sits against a light-colored wall. To the right, another large black storage box is next to several potted plants, including a tall spiky one. A wooden fence and a hanging basket of green plants are in the background. In the foreground on the right, a wicker chair and part of a table are visible. A green arrow-shaped graphic points from the left towards the center of the image.

**Discovering our
natural area.**

Our back garden.

Exploring our area.

Wasps looking for pollen!

We found a newt in a bucket of water!

Birds in the back Garden looking for worms!

Fun Fact

**Newts are amphibians
They can live in water
and on land.**

What we found

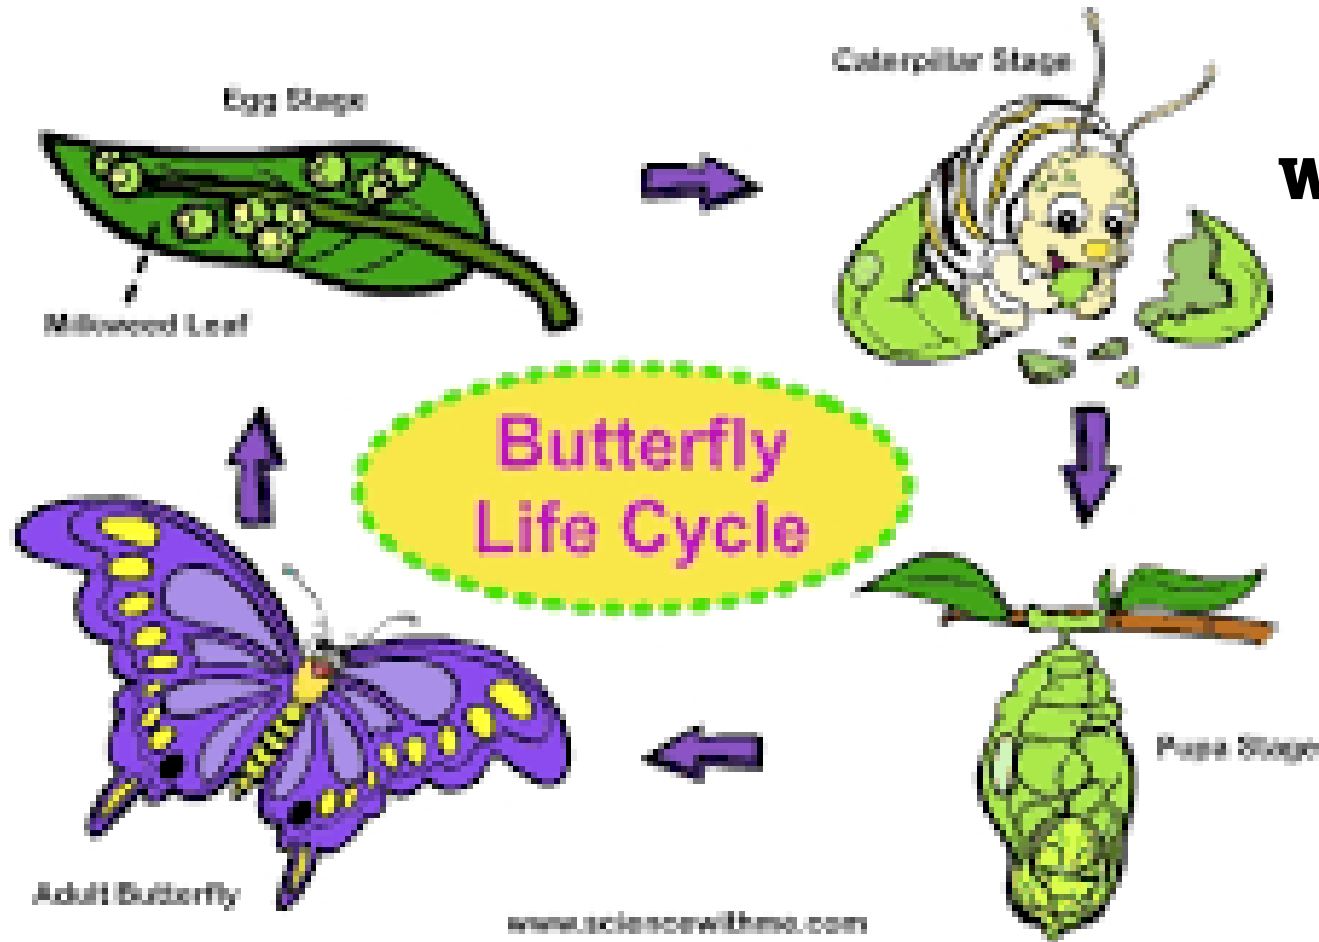

We have lots of Bumblebees in our garden. They always are seen around the Fuschia plants getting the pollen.

We had to research what these were as we knew this was a Caterpillar but next to the Caterpillar it looked like there eggs so we googled Caterpillars eggs and that is what they are. Caterpillars eggs, where we thought they would be on leaves.

The lifecycle of a Butterfly.

**We learnt about the
Lifecycle of a
Butterfly.**

Fun
Fact

Lavender

Over 2500 years ago lavender was used in ancient Egypt during the mummification process.

Some different Flowers in the back garden. Many different colours and textures we could see.

My daughter loves the Buttercup flower and always puts it under her chin or likes to put it under other peoples chins to see if they like butter.

What we found

We have lots of bark out the back garden and these are some of the bugs you'll find there.

What we found in the bark

Snail.

Woodlouse.

What we found

We had so much
fun making a
daisy chain
from the
Daisies.

Dandelion poem.

Be a dandelion in a world of roses
Inspire wishes in kisses of stolen breath
Complete your phase in celestial dreams
Of the Sun moon and stars
While setting your roots deep
In the warm earth amidst blades of humble
grass.

We learnt this dandelion poem together.

Conserve Making our bug hotel.
We decided to make the bug hotel as we have many bugs in our back garden as they are attracted to the wooden bark we have, we thought this would be a nice place for them, which was safe.

We made the Bug Hotel as we thought this may attract more bugs and insects to our garden.

Conserve

We are going to let our grass grow to see more wildlife in our garden and hopefully see more Caterpillars and see them turn in to a butterfly.
