

MAJOR PROJECT - Final Report – 55%

Student Name:	Myles Anderson
Title of Project:	Business Computing System & Electric Vehicle Technology
Supervisor:	Tara Williams
2 nd marker:	John Rees
Course:	BIT <u>BusComp</u> CIS CNetS CSE Electrical Games Mobile TRE SE Web (please circle)
Project Type:	<u>Survey</u> Review Experiment Development (please circle)

	Mark %
<u>First Marker's General Comments and Original Mark</u> 	
<u>Second Marker's General Comments and Original Mark</u> Well presented, nicely written report. A few issues with referencing. The underpinning research is good, and the survey well targeted and implemented. The implementation is well thought out as a prototype, and the observations on scalability and future development are sound.	77
<u>Comment After Consultation With Other Marker & Final Agreed Mark</u>

	Survey	Review	Experiment	Development
1. Research-informed Literature				
Introduction	4 /5	/5	/5	/5
Literature Review	16 /20	/35	/20	/15

Comments:

Clear exposition of topic and reason for project. Good definition of aims and objectives, SMART in approach.

Use of literature supports the project. Strong on electric vehicle development ~~at~~ and the capabilities of the technology. GIS explanation is really good.

	Survey	Review	Experiment	Development
2. Knowledge and Understanding of Subject				
Methodology	4 /5	/5	/5	/5
Survey Design	12 /15	-	-	-
Requirements/Design	-	-	-	/5

Comments:

Buils on 2nd year Research Methods work to justify the chosen approach. The structure follows the "researcher's" format, and applies it to each layer.

The questions are well constructed.

The use of a pilot is a strength. The report does consider the classic issues of validity, reliability and generalisation.

The software approach is justified and comes over as suitable.

	Survey	Review	Experiment	Development
3. Analysis				
Results & Discussions	21 ~~20~~ /25	/25	/25	/25
Conclusions and Recommendations	7 /10	/10	/10	/10
Comments: The interpretation and presentation of the survey is excellent for an inexperienced researcher. The use of graphical presentation is sensible and avoids excess. The consideration against the original aims and objectives is a rational approach. Overall, the report identifies some interesting findings. The website then presents a useful representation of the key factors for EV owners. The consideration of scalability and practicality for future development is, again, a strength.				
	Survey	Review	Experiment	Development
4. Practical Application and Deployment				
Development	-	-	-	/15
Experimental Design	-	-	/15	-
Comments:				

	Survey	Review	Experiment	Development
5. Skills for Professional Practice				
Reflection	7 /10	/10	/10	/10
Quality of Report	6 /10	/10	/10	/10
Comments: Some good evaluation and consideration of the project process and outcomes. The report contains a small number of grammatical solecisms. It lacks page numbers, which detracts from its usability for the reader. The references are not in the right format (we specify IEEE/Vancouver). The ~~writing~~ writing is, however, relatively easy to read, decently paced, and makes good use of the data and supporting graphics.
