

English

Rhian has explicitly shown confidence in her ability to communicate her ideas with others; ideas and opinions portrayed thoughtfully and purposefully-linked to persuasive arguments lessons (for/against school uniforms/leisure centre) (Level 4) Rhian is able to take the lead within group discussion where need be and sensitively respond to the ideas and opinions of her peers (Level 5) For example, taking the role of a 'director' and asking the presenters probing questions to justify why she should purchase their new chocolate bar inventions. Her vocabulary choices whilst writing are sophisticated and engage the reader i.e. use of powerful adjectives and rhetorical questions within persuasive letter writing/poster presentations. Rhian's work is *consistently legible and well presented* (feature of level 5). Therefore, I feel Rhian is beginning to achieve level 5, working towards fulfilling all features.

One area for future development will be to continually expand on her developing vocabulary bank; to use paragraphs appropriately within her written work.

Mathematics

Within Mathematics, Rhian has shown excellent engagement during the study of Co-ordinates and Line graphs. Rhian has *used and interpreted co-ordinates within the first quadrant* independently; using thinking skills to create own treasure map with co-ordinate symbols and corresponding questions to challenge her peers (Level 4). She also progressed to plot and draw co-ordinates to create various polygons, within the second quadrant also. Rhian has *constructed and interpreted simple line graphs*; compared maximum annual temperatures, temperatures over time also through collecting raw data. Rhian used this data to create and present a line graph on Microsoft Excel, labelling all axes appropriately and reading scales in order to make relevant and perceptive inferences from the graph successfully (Level 5). Therefore, I feel Rhian is at level 4, working towards fulfilling all features of level 5.

Area for future development: use co-ordinates confidently in all four quadrants (Level 5).
