

MARKING CRITERIA and STUDENT FEEDBACK

This section details the assessment criteria. The *extent* to which these are demonstrated by you determines your mark. The marks available for each criterion are shown. Lecturers will use the space provided to comment on the achievement of the task(s), including those areas in which you have performed well and areas that would benefit from development/improvement.

Common Assessment Criteria Applied	Marks Available	Marks Awarded
General Comments		
Overall this is a good technical section with a limited report that lacks depth in your conclusions and research. More detail here would have improved your mark drastically.	100	58
1. Engagement with Literature Skills		
You have researched the topics, listing many sources of information in your bibliography which you have referenced in your document. However more referencing of academic papers would have broadened your research	20	12
2. Knowledge and Understanding Skills		
You have started by describing a type 1 hypervisor. but there is no statement on a type 2, just a move into describing 2 different type 2 products. Overall the same problem is with IP addressing and there is no testing section.	12	7
3. Cognitive and Intellectual Skills		
This section lacked any depth to your observations and was very basic. Much more depth and detail is required to show your understanding	15	3
4. Practical Application Skills		
You have set up the network, but not all devices have the correct default gateway applied. In addition you did not ping all 4 machines to test connection	40	30
5. Transferable Skills for Life and Professional Practice		
A well laid out report clearly laid out in sections. All data requested is included.	10	6

Assignment Mark (Assessment marks are subject to ratification at the Exam Board. These comments and marks are to give feedback on module work and are for guidance only until they are confirmed.)	Late Submission Penalties (tick if appropriate)		58
