

Assignment Requirements for task2

Academic and Employability skills (ACE)

Student : Kapo Celestin Dagrou

Student ID :2019681

Group : 8

We have just finished the first part of our course: Academic and Employability skills (ACE)

This was a real Pleasure because it made it possible to understand much more the importance of

Employability skills.

I can clearly say that nothing is ever late to learn.

There is an event that has made itself indispensable for the realization of different courses.

Online experience.

My report will be about Online Learning.

The world is facing the Covid 19, which for more than a year has been straining the world's health authorities; containment and conflicts follow each other.

Public places are firm (football stadium, shopping centre, nightclubs not to mention schools..)

It is in this atmosphere that the courses were followed thanks to the magic of technology.

To spare a large contamination to this large part of society, the education authorities have decided to introduce online learning with everything that it can contain as consequences.

The online study is a good experience that shows all the progress of technology in the 21st century.

Without hiding my face, I must recognize that this advantage can also present nefast effects such as: plagiarism, laziness The problems of connection, electricity or even computer can make regret the face to face study.

The envy of our online learning can at any time be inadequate because of a crying baby.
