multiple formats.

Here are my top 5 reasons 1.Credibility 2  
Increases page views..... 3 Improves SEO....4 Assists  
the call to action.... 5 Usability. Work link.....A  
link(short for hyperlink) is an HTML object that  
allows to jump to a new location when you click or  
tap it. links are found on almost every webpage  
and provide a simple means of navigating can  
between pages on the web. links can be attached  
to text ,text, images, or other HTML elements.  
Important of hyperlink..... Hyperlinks are the  
essence of the world wide web. Their importanceis  
very high due to their ability to provide a visitor  
with a wealth of good quality information and for  
the role they play in the ranking of sities by  
modern search engines.

Hyperlink in power point alternatively referred to as  
a link and web link a hyper is a icon,graphic or text  
that link to another file or object. for example-  
Computer hope home page is a hyper link to the main  
page of comuter hope.A link is simply an address that  
specifies the location of a resource on the internet  
just like an URLwhich takes you to the web pages  
identified by the linked URLs. hyperlink,on the other  
hand,are links that you can click on or activate with  
apointing device in order to jump to the target page.  
Purpose-The Hyperlink function create a shortcut  
that jump to another location in the current  
workbook,or opens an intranet,or the inernet.when u  
click a cell that contains a HYPERLINK function,Excel  
jump to the location listed,or opens the document  
you specified.Regular use of hyperlinks will improve  
your SEO and make life easier for your readers....
