TIME MANAGEMENT

Before starting the course, I wasted most of my time doing nothing, just spending hours on social media. But since I started my Health and Social Care course. I have been searching for the best way to spending my time. At this moment, I waste time especially searching and find out how to get into a Nurse/Midwife without spending my time on things that do not matter. Be a Mother, Student and, Worker is not easy, but I will get there in time.

I find many ways to manage my time between days.

SWOT ANALYSIS

Swot Analysis is one of the Topics that I learned from the lesson that I had with The SWOT analysis. I had the opportunity to write about my strengths, weakness, opportunities, and threats. I have found out more about my personality. It was a personal exercise, but I choose to share this with my Teacher.

ONLINE LEARNING EXPERIENCE

Online Learning is not easy, So is my first time as an online student, I did not have any experience before, but with those lessons that I had, I can say that it's not that bad, But sometimes it's difficult when I thinging intake a note of any slide, and the teacher just passes through to next slide. I felt uncomfortable asking them to come back and make other students get late, so I always try to make notes as quickly as possible.
