

Research Participation Log 2018/2019

Level 5 Research
Design and Analysis
(M5X00913)

Study One Study Code: SWAN creditAHC1

Study Code: SWAN_creditAHC1

1) Was the BPS Code of Human Research Ethics followed? (E.g. was informed consent gained? Were you aware of your right to withdraw? Was confidentiality upheld?)

Yes ☒

No ☐

If not, which guidelines were not followed?

Describe how the ethical guidelines were followed?

__All_relevant_human_research_ethics_appear_to_have_been_followed,__
__Also_initial_discription_suggested_that_potential_participants_who_consi
der_themselves_to_react_in_an_aggressive_manner_were_advised_not_to_
take_part.

[illegible]

Note:

This image shows a single sheet of white paper with horizontal blue or grey ruling lines. The lines are evenly spaced and run across the width of the page. There is no text or other markings on the paper.

How were you fully debriefed after completing the study? Were you provided with details of the researcher (e.g. email address) and given the opportunity to discuss with them after completion?

_I was given a debrief form at the end of the experiment and given the opportunity to discuss the experiment with the researcher.

Are there any areas of improvement for this research study? (think about the materials used in the study and how the researcher carried out the study)

Not that I can think of, I think it was well organised and conducted.

Name (PRINT):_CHRIS EVANS

Sign: C Evans

Date:

Briefly describe/outline the study you participated in (What were you asked to do? Did you understand the purpose before/during the study?)

_A two part study both online and in the lab, the online part was a number of questionnaires to complete, then the lab experiment was to play a game of Call of Duty whilst having my skin conductance levels measured by using electrodes, this was followed by five minutes of meditation. I assumed the test was to test pressure levels.

Briefly describe your experience of taking part in this research study (positive aspects/issues that may have impacted your participation)

_It was quite relaxed, and always good experience for my future studies.

How were you fully debriefed after completing the study? Were you given opportunity to discuss with the researcher after completion?

__Yes_i_was_fully_debriefed_and_given_the_opportunity_to_discuss_the_experiment_with_the_researcher.

Are there are any areas of improvement for this research study? (think about the materials used in the study and how the researcher carried out the study)

__Maybe_asking_if_the_participant_is_taking_any_medication_that_might_have_a_calming_effect,_like_betablockers_or_anti_depressants?

Date:

Briefly describe/outline the study you participated in (What were you asked to do? Did you understand the purpose before/during the study?)

This was a lab based study where participants were asked to complete a questionnaire about their views on binge drinking. It was a pretty straight forward study and a typical subject for students.

Briefly describe your experience of taking part in an online research study and how this experience differed from a lab based study (positive aspects/issues that may have impacted your

This was a lab based study, I completed an online one earlier, and obviously I struggle with technology (see the rest of this report) however I believe an online study gives a greater sense of anonymity so is better for recruiting participants that don't feel comfortable speaking openly about certain subjects.

Online Study Study Code: SWAN_credit_AMD

1) Was the BPS Code of Human Research Ethics followed? (E.g. was informed consent gained? Were you aware of your right to withdraw? Was confidentiality upheld?)

Yes ☒

No ☐

If not, which guidelines were not followed?

Describe how the ethical guidelines were followed?

_As far as I could see all appropriate human research ethics were followed. Informed consent was given, advise that participants with previous alcohol issues were advised to not complete the study, and there was a debrief at the end.

This image shows a single sheet of white paper with horizontal blue or grey ruling lines. The lines are evenly spaced and run across the width of the page. There is no handwriting or other markings on the paper.

[illegible]

Study Two Study Code:SWAN_credit_VD

Study Code:SWAN_credit_VD

1) Was the BPS Code of Human Research Ethics followed? (E.g. was informed consent gained? Were you aware of your right to withdraw? Was confidentiality upheld?)

Yes ☒

No ☐

If not, which guidelines were not followed?

Describe how the ethical guidelines were followed?

All appropriate human rights ethics appeared to have been followed, The right to withdraw was offered.

This image shows a single sheet of white paper with horizontal blue ruling lines. The lines are evenly spaced and run across the width of the page. There is a vertical margin line on the left side, creating a narrow left margin. The paper appears to be from a notebook or a standard sheet of stationery.

Note:

This image shows a single sheet of white paper with horizontal blue or grey ruling lines. The lines are evenly spaced and run across the width of the page. There is no text or other markings on the paper.

How were you fully debriefed after completing the study? Were you given opportunity to discuss with the researcher after completion?

This was an online study so the debrief was given once the questionnaire was completed/

Are there any areas of improvement for this research study? (think about the materials used in the study and how the researcher carried out the study)

No, I believe online studies in this situation are quite a good idea as the participant may not want to speak openly about their condition.

Name (PRINT): CHRIS EVANS

Sign: C Evans

Briefly describe/outline the study you participated in (What were you asked to do? Did you understand the purpose before/during the study?)

This was a lab based experiment completing two questionnaires. The aim of the study was to explore the effects of suicide prevention campaigns, and got an idea of what it was about as I completed the questionnaires.

Briefly describe your experience of taking part in this research study (positive aspects/issues that may have impacted your participation)

It was a relaxed study, and good experience for my future studies.

How were you fully debriefed after completing the study? Were you given opportunity to discuss with the researcher after completion?

_I was given a debrief sheet at the end of the study and we discussed it briefly, _____

Are there any areas of improvement for this research study? (think about the materials used in the study and how the researcher carried out the study)

No I think it was concise and to the point. _____

Date: 26/

Briefly describe/outline the study you participated in (What were you asked to do? Did you understand the purpose before/during the study?)

_This was an experiment into coping styles and gender differences with regard to the psychological impact of living with a skin condition. A questionnaire was completed to research peoples attitudes towards how they cope with their condition. _____

Briefly describe your experience of taking part in this research study (positive aspects/issues that may have impacted your participation)

_It was an online study so reasonably impersonal, and the right to withdraw was given so I didn't feel under any pressure to complete it. _____

Study Four Study Code: SWAN_credit_OH

Study Code: SWAN_credit_OH

1) Was the BPS Code of Human Research Ethics followed? (E.g. was informed consent gained? Were you aware of your right to withdraw? Was confidentiality upheld?)

Yes ☒

No ☐

If not, which guidelines were not followed?

Describe how the ethical guidelines were followed?

All appropriate human research ethics appeared to be in place, informed consent was presumed by continuing with the study after a description of the study was given, participants advised not to continue if they feel uncomfortable, and the right to withdraw was given.

[illegible]

Note:

This image shows a single sheet of white paper with horizontal blue or grey ruling lines. The lines are evenly spaced and run across the width of the page. There is a vertical margin line on the left side, creating a narrow left margin. The paper appears to be from a notebook or a standard ruled document.

Study Three Study Code: SWAN_CREDIT_CJ

Study Code: SWAN_CREDIT_CJ

1) Was the BPS Code of Human Research Ethics followed? (E.g. was informed consent gained? Were you aware of your right to withdraw? Was confidentiality upheld?)

Yes ☒

No ☐

If not, which guidelines were not followed?

Describe how the ethical guidelines were followed?

All appropriate human research ethics appeared to have been followed, and a debrief form given.

_____ was advised that had to be over 18 and comfortable watching a bank robbery and identifying suspects in a line up, _____

This image shows a blank sheet of white paper with horizontal ruling lines. The lines are evenly spaced and extend across the width of the page. On the left side, there is a vertical green margin line. The paper appears to be part of a notebook or a set of loose-leaf papers.

Note:

This image shows a single page of white paper with horizontal blue or grey ruling lines. The lines are evenly spaced and run across the width of the page. There is no handwriting or other markings on the paper.

How were you fully debriefed after completing the study? Were you given opportunity to discuss with the researcher after completion?

_A debrief form was given, and the opportunity to discuss the experiment with the researcher

Are there any areas of improvement for this research study? (think about the materials used in the study and how the researcher carried out the study)

Possibly asking if the participant is on any medication or has any conditions that may affect memory?

Name (PRINT): __CHRIS EVANS

Sign: __C Evans

Date:

Briefly describe/outline the study you participated in (What were you asked to do? Did you understand the purpose before/during the study?)

_I watched a video of a mock up robbery and was then asked to identify the robber.

_I had a rough idea what the experimenter was looking for, which I believed was how my memory would work after being distracted by a crossword in between the robbery and line up.

Briefly describe your experience of taking part in this research study (positive aspects/issues that may have impacted your participation)

It was a relaxed well put together experiment, and good experience for future studies.
