Lecturers will use the space provided to comment on the achievement of the assessment, including those areas in which you have performed well and areas that would benefit from development/improvement.

Identify and critically evaluate an intellectually challenging idea that would be appropriate for their Major Project	66
Your Adios music video idea should provide an oppertunity for you to develop production skills and at 3 minutes duration would be appropriate to the field as well as the module requirements. Your logline is good and makes a clear statement about your intentions. Your proposed idea deals with an interesting and current issue which you have proposed to manage its portrayal in the film appropriatly.	
Communicate effectively the research areas, design solutions, technical requirements, and overall specification relevant to their Major Project idea, using contemporary methods and techniques	66
Your visual research is particulalry intresting and relavent. You have demonstrated some good consideration to the intended camera techniques and shot types. You made some good use of technical language during the presentation, but you could develop this further during production to help your understanding of the industry. You have done well to identify your need to upskill to be able achieve what you desire in this project. How will you manage the noted threat of lighting? This can be managed through research and planning. As there was no schedule provided during the presentation you need to consider how you will manage the availabele time to meet your aims. Overall the idea is good, but it could be developed further, in particular the structure.
