Section	Your response (Use your own words!)
1. Research	The topic of my research is about the role I chose in health and social care. I choose child psychology and explain the importance of this role in our daily life. Families with children in need of support suffering from different types of illness or disabilities. To become a child psychologist someday is my biggest dream in life.
2. Presenting	I presented in the class about how child psychologist helps children and adolescents improve their daily life and wellbeing. Explaining to them why I chose the role and why this is important to me. To be able to help makes a big difference to others. Presenting in front of the whole class is not easy but I tried my best.
3. Challenges you faced	Before the day of the presentation, I had a lot of difficulty trying to memorise everything I could, during my turn to present my work I started to feel uneasy and nervous. Fortunately, I made some notes just in case I made a mistake and used it while I am presenting. Preparation is very important, on top of that being nervous is not helpful.
4. Actions to improve	After my presentation I am not sure if I did well, I asked myself if my research is enough. In addition to this I did not pursue the role due to the length of studies. Although it's my first time presenting in the class is even harder. Even so, I will make sure that I will improve my work and make all the necessary preparation for my presentation in the future.
5. Further steps needed to Prepare for Task 3	Despite that this role will take up a lot of time studying, this is the role I chose, and I believe I can find a way. To prepare myself for task 3, I need to expand my research, find reliable sources and ask the school library to help me how to find the right website, books or articles regarding my chosen role.
