

Name: Sara Busuioc

Student ID: 2536032

Module Code: LCHS4001

Module: Academic & Employability Skills

Lecturer: Charissa Brian

Submitted on: 8 July 2026

Section	Your response (Use your own words!)
1. Research	I started my research by using Google to find information about Children's (Paediatric) Nursing. I searched using keywords such as <i>paediatric nurse, skills required to be a paediatric nurse, and paediatric nursing education and training</i> . I used the NHS Health Careers website and the Royal College of Nursing because they provide reliable and up-to-date information. I also used the CRAAP Test to check that my sources were current, exact, relevant, and trustworthy. This helped me choose the best information for my presentation.
2. Presenting	I organised my research into clear sections before creating my presentation. I made sure the information was easy to understand and covered the role, skills, qualifications, and responsibilities of a Children's Nurse. Preparing the presentation improved my understanding of the career and helped me become more confident. Before presenting, I plan to practise speaking clearly so I can explain my research with confidence.
3. Challenges you faced with your presentation	One challenge I faced was deciding which information was the most important because there are many different nursing specialities. It also took time to find the most reliable websites. I overcame these challenges by comparing information from trusted sources such as the NHS and the Royal College of Nursing. I need to improve my confidence when presenting my work.
4. Actions to improve	In future, I will improve my research by using advanced search techniques such as Boolean operators, quotation marks, and search filters to find reliable information more quickly. I will also spend more time planning and practising my presentation. These actions will improve both the quality of my work and my confidence when presenting.

5. Further steps needed to Prepare for Task 3	To prepare for Task 3, I will continue researching Children's (Paediatric) Nursing using reliable sources. I will improve my research, organisation, and presentation skills by organising my notes, keeping accurate references, and practising my speaking. My aim is to produce a well-structured report that proves my understanding of Children's Nursing and prepares me for future university study and a career in healthcare.
