Comments: - You provide a thorough & well presented answer to the first question. Through use of Midgley's claims, arguments & ideas are discussed in a way that furthers your answer to the question set. Indeed, there's an acute focus on the task, & you evince an excellent grasp of the topic. - Again, your answer to the second question shows a very good understanding of the main ideas, but some bits of your answer could be presented more clearly. Closer attention to the English is needed in places. But, overall, you present a relatively sophisticated answer to the question set.
