

Student Name: Anna Jones

P Number: 2317365

Program Study: Design Craft

Module: ADDA4022

Tasks in order that retrieve them:

Task one: Manifesto =

Task one: Manifesto

- Highlighting and developing an understanding of everyday stories. How alike and different each other are.
- To use fragile materials such as porcelain and glass to symbolize human emotions and how fragile they really are.
- People should be able to react to art in their own way and make their own meaning toward it.
- Pushing and listening to the materials to see where it wants to take me.
- Highlighting everyday issues that people come across every day. (Cost of living crisis, sexism, the hate towards the LGBTQIA+ community and racism)
- Combining different materials together like glass and clay to push the boundaries on the material.
- My work symbolizes and the meaning towards it is growth.
- Sexual assault should be taken seriously towards men, women and people.

My work symbolizes and the meaning towards it is growth.

Throughout history the term growth has been symbolized and used in many different ways, for example the greek symbolism for growth is triskelion. In translation is 'three-legged', the triskelion is a symbol of strength and ability to move forward as beings. This symbolism is a culture meaning and people do follow it. However, in science the term growth is completely different. 'Growth is the irreversible increase of an organism's size over a given period. It may also be defined as one of the characteristics of a living thing. In biology, "biological growth" is associated with progressive development. An organism's growth may go on throughout its life, or end when that species is fully mature.' (Anonymous (2021))

Having two different meaning toward just one term this can make different outcomes when mixing the two or just separate outcomes. For my work and process I like and will want to adventure into the meaning growth and mixing the culture and science meanings together. To really push the boundaries on a simple word.

[add two book quotes in this text]

Sexual assault should be taken seriously towards men, women and people.

Sexual assault and harassment unfortunately doesn't get taken seriously. '1.1 million adults aged 16 years and over experienced sexual assault in the year ending March 2022' (Office national statistics (23 March 2023)) and many doesn't get reported. My belief is that nothing will change if people like Andrew Tate have a platform on social media because younger people (mostly young boys) will take what is said and done seriously and act towards people in that manner. Within my work I would like to highlight these issues and make people aware about this issue that is happening everywhere.
