Values: Personal and Professional

Trawsnewid Addysg; Trawsnewid Bywydau
Transforming Education; Transforming Lives

www.uwtsd.ac.uk

What are my personal values?

What are my professional values?

What is the difference between personal and professional values?

What are the professional values of
my workplace?

Do I share these values?

Do I think most of my colleagues
share these values?

What is the difference between individual and collective values?

How do all of the different values in my life interact with each other?

- Do they ever compete?
- Do they ever support each other?
- When they do compete, what determines the values that win out?
- Does the way I live my life reflect my values?
- Does the way I work reflect my values?

The Six Levels of Incorporating Sustainability

Pre-Sustainability	Compliance-Driven Sustainability	Profit-Driven Sustainability	Caring Sustainability	Synergistic Sustainability	Holistic Sustainability
Basically no ambition for Sustainability. Some steps labelled as 'Sustainability' might be imposed from outside. Close monitoring and constant reinforcement required.	Providing welfare to society within the limits of regulations from authorities May respond to charity and/or stewardship considerations based on a perception of sustainability as a 'duty'	Integration of social, ethical, and ecological aspects into operation and decision-making, as long as it positively impacts finances 'Business-case' Sustainability – i.e. improving reputation to increase sales	Balancing economic, social, and ecological concerns as important in themselves Motivated by potential, social responsibility, or care rather than compliance or profit	Searching for a well-balanced way to create value in the economic, social, and ecological realms Seeking win-together solutions Sustainability is the inevitable direction of progress	Fully-integrated Sustainability at all levels, aimed at contributing to the quality and continuation of life of every being and entity, now and in the future Everything is mutually independent, so sustainability is the only option
