

- Basic Digital Safety

01

Digital Safety at work

- make sure your software and your applications are up to date
- Turn on 2-step verification
- Secure your most important documents, photos, by saving them in more than one place

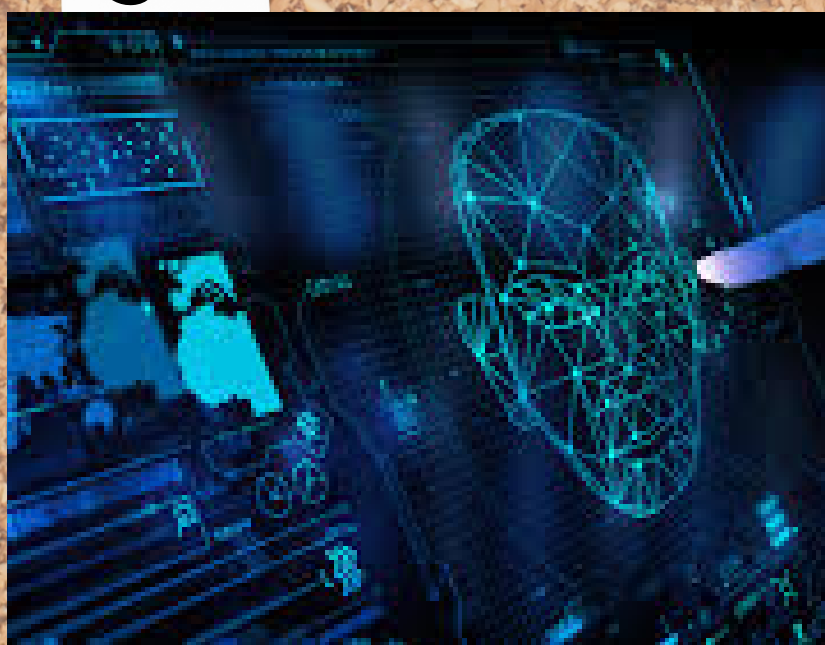

02

Digital safety at home

- using strong and separate password to protect your emails
- keep your devices up to date
- shopping and paying safely online
- educate your children about online risks like cyberbullying

03

Digital Safety at public spaces

- Losing or having stolen your device – either when you leave it unattended or while you are using or carrying it
- people viewing your screen
- don't use public network to access personal information
