

Political: Local government support, business regulations, and industry standards affecting garages.

Economic: Area's demand for garage services, impact of local income levels and competition.

Social: Community trust, attitudes towards local business, car ownership rates.

Technological: Availability of repair and diagnostic technology, new vehicle types and tools.

Legal: Business licensing, health and safety requirements, insurance, and employment law.

Environmental: Waste management rules, pollution controls, and sustainability practices in vehicle repair.

I chose a Private Limited Company (Ltd) – Limited by Shares as the legal structure for my startup because it keeps my personal money and my business finances separate, protects me if things go wrong, and makes it easier to attract investors and grow my business. This structure also gives my company more credibility and helps me plan for the future.
