Introduction

~~The digital skills module~~, throughout this module our aim was to do a blogs whatever we have done and the task we did in this modules we needed to write about this in this blogs. These are the task we have done throughout the lecture. We have created a blog account, questionnaire, Gang chart, and created a website. The task we have cover in this digital skills mainly for the Business proposal for Managing Enterprise in the 21st century module. Our business proposal is to open a Wellbeing Fitness 4 women Gym. In the John Burn fitness building. The building will be under lease and the product we are offering are swimming pole, Jacuzzi sonar fitness instructor, also we will be having ready made lunch to take home after Gym for the busy mums.

So what research led-
you to deciding on this
type of business?

Main body

In this modules our main aim was to record every task we do in the class. This way we can write about it on the blogs. So we have created a blog account on the first lecture. Also we created a new email address and password.

Throughout the lecture what we have covered are:

Blogs account

Gang chart

Questionnaire

Website

Wobbly account

You needed to
follow the in-class
assessment guidelines.
This is more like a
blog!

We have learn to do a gang chart layout for the Managing enterprise modules to record our everyday task.

Questionnaire that we have design based on the business that is gym to analysis how many people would use regularly or weekly and monthly.

To create the website we needed to open an account on ^{wobbly}wobbly.com. This was my first time creating website, I have found difficult throughout so my friends and the lecturer help. I have manage eventually how to create the website in dummy version.

The Website that we have created in a group they are Jaly begum, Rima begum, Honufa begum and my self Hashina begum. This website that we have created for the business proposal that is the gym. We started designing the website in the class but we couldn't finish it off because some off our group member didn't attend on that day. So we had to come together out of class to complete the website. Every member of the teams has contribute on the website by adding different information.

Conclusion

This assessment based on what we have learned throughout this modules. The task we have done and how we over come through straggle. I have learned many task and many digital skills that I was un wear of it. Specially designing the website. The input I put in this website is gathering photos and information about the availability of the product in the gym. I have also help with the layout of the website. This whole website was design by the whole group and gather different information by each member.
