

What is Critical Thinking?

Critical thinking is when you examine ideas or information from an objective position taking into account your own emotions, values, attitudes and experiences.

Cottrell (2005) describes critical thinking as 'a complex process of deliberation which involves a wide range of skills and attitudes'

Objectivity

Objectivity is when you read, think and write without bias on the given subject. It is when you look at the available evidence, questioning the authenticity of the information and looking to see if there is bias towards one perspective.

Objectivity

Objectivity is when you read, think and write without bias on the given subject. It is when you look at the available evidence, questioning the authenticity of the information and looking to see if there is bias towards one perspective.

Personal reflection
It is easy to allow bias to show in your work, based on personal experiences or emotions. Any information given should be based on facts with evidence to support it

Subjectivity

Subjectivity is when something is based on, or influenced by, personal feelings, experiences or opinions.

Subjectivity

Subjectivity is when something is based on, or influenced by, personal feelings, experiences or opinions.

It is important to look at the facts and opinions, question them, and come to my own conclusions.

Personal reflection

It is critical when looking at information to question everything you read. Not everything is based on facts and if at any point you are unsure then find more evidence on the subject to help you to come to a conclusion.

Personal reflection

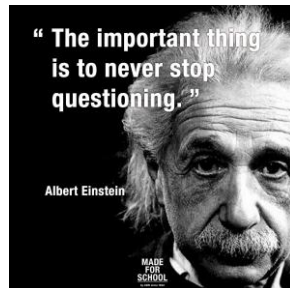

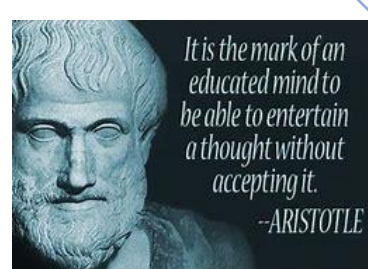

It is critical when looking at information to question everything you read. Not everything is based on facts and if at any point you are unsure then find more evidence on the subject to help you to come to a conclusion.

Rhetoric

Rhetoric can be used to persuade or manipulate the reader into believing information without providing evidence to support your point of view.

Rhetoric

Rhetoric can be used to persuade or manipulate the reader into believing information without providing evidence to support your point of view.
