YEAR 2015

OSBORN'S FARM REHABILITATION

The Osborn Farm where Hazel and Robert putting there efforts to cultivate, was badly hit by typhoon Yolanda. Year 2015, these couple meet the PAKISAMA (Funded by ASIADDRHA) which aims farm rehabilitation using IDOF

PLANTING CROPS INCLUDING BANANA (SABA).

Our Banana Plants Starting to Grow together with other crops!

Year 2016

Start of our Food Processing Journey

First harvest.

Farmer Jon Sarmiento Suggested making it Banana Chips instead of selling it in the market :)

We Start making Sugar Sprinkled Banana Chips and Seal them using a Mosquito coil or Candle.

Year 2016

We really wanted to improve our banana chips. And we've heard about the Omaganhan Cooperative are processing Banana Chips which is one of the popular banana chips in Leyte. We've heard also that they're having financial training. We really have the eagerness to learn. So, when Farmer Jon invite us to attend the training, we immediately grab the opportunity.

Finally, around 1 o'clock in the morning, the Manager of Omaganhan Cooperative taught us how to make Banana Chips, where to buy the packaging and cooking materials.

My husband and I were very excited to go home and apply our learnings. We hurriedly bought packaging material and cooking material and started to make the banana chips, worth 10,000 pesos.

Year 2016-2017

October 2016 to February 2017, we started making banana chips at home, with two (2) workers and produced an average of 1,500 pesos worth of product per day.

March 2, 2017, we are officially certified food processor company in the eyes of our Government :)

March 3, 2017- May 7, 2017, we're still working at home with four (4) workers and produced an average of 4,500 pesos worth of product per day.

Our products, are ready to deliver. We personally deliver it in the stores.

(There are times that we insist the store owner display our products in their stores.)

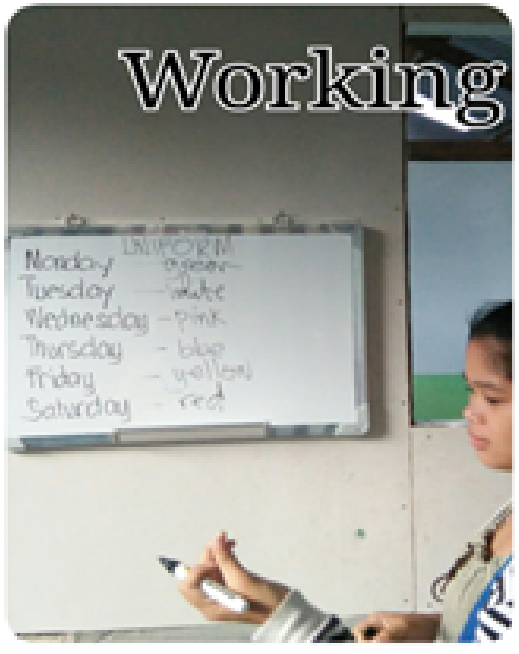

Year 2017

May 9, 2017

We already have our Manager :)

On her way to our small factory :)

May 9, 2017, to August 2017, we start working at a small factory with eight (8) workers and produced an average of 7,000 pesos per day.

JANET PAJUELAS Janetwork

September 2017, we start working at the renovated small factory with 13 workers and producing an average of 10,000 pesos worth of product per day.

Year 2017-2018

Our Small Factory

November 2017, working at the renovated small factory with 13 workers and producing 3,000,-16,000 pesos worth of product per day.

2018, can produce worth of 18, 000- 25,000 product per day with 16 staffs.
