GOALS	OBSTACLES	HOW TO SUCCEED	SUPPORT	PROGRESS	COMPLETION DATE	ACHIEVED
COMPLETE UNI	Stressful environments whilst studying and creating the thought of quitting. Lack of finances to provide for myself whilst at uni. The course transferring to a different location.	Creating a stress-free environment for myself to escape to so I have a space to clear my head and regain focus. Figure out a balance between work and uni life. Try not to overfill my calendar with one more than the other. Seek advice and help from the university and see what help they can provide. Such as, bursaries	Lecturers will be around when I need help in understanding topics. Support worker will be with me. To help me with any theory work I don't understand. Work are understandable so will help accommodate my needs.	The second year did make me worry about finances, so it does cause concern for third year. I can use the summer holidays to build up a savings to use whilst back at uni	June 2024 (Graduation)	
ADD HGV TO DRIVING LICENCE	Money – not having the funds to pay for the lessons. Time – not having the time to go and take lessons because I am working to build up funds for the third year of uni.	Carefully plan a budget to allow myself to get lessons.	I think I will only have time to plan to get this license so I can speak to my work management to help arrange time to fit it in if it does come to it.	Not started	June 2024 (Graduation) I set It to my graduation date because I think it will be a good time period to get it done by.	
LEARN MORE INDUSTRY SKILLS	Going into the third year might limit the new skills I could possibly learn. Being limited when I leave university because I can't get into teachable experiences.	Always ask questions “no such thing as a silly question” Ask to be a part of learning experiences that come to the university for other year groups.	People ive previously worked with have offered to help me when I need to know something and they're offering learning opportunities.	On going	No set date because I can always learn new things where-ever I am in my career.	
FIRST AID TRAINING	Time Management – not being able to schedule in the training whilst during education	Sign up to newsletters so I can stay updated when they are local or even offering discounts.		Not Started	June 2024 (graduation)	

	and/or summer holidays. Money – Not having the funds to take the course or even create/buy the bags/git Location – finding somewhere that holds the course locally without the need to travel which would also effect the costs. Travel – how would I get there? If I do have to travel which method would it be?	Talk to people who have previously done the course.

Here is my Art Steps link ^

I had many struggles with art steps because it's not the best format for the work I have or want to find work for. I tried to convert images and videos, but it did prove difficult because every time I uploaded them it was just a blank screen. I've had technical difficulties for a few weeks now but I have finally done it and submitted it.

Thank you !
