

MAJOR PROJECT - Final Report – 55%

Student Name:	Simon Oglesby
Title of Project:	British Steel Gas Consumption Project
Supervisor:	Nik Whitehead
2nd marker:	John Rees
Course:	BIT BusComp CIS CNets CSE Electrical Games Mobile TRE SE Web (please circle)
Project Type:	Survey Review Experiment Development (please circle)

	Mark %
<u>First Marker's General Comments and Original Mark</u>	
<u>Second Marker's General Comments and Original Mark</u> Well presented, nicely written report. The project is fully professional and features the aspects one would expect of a commercial development. The report is, also, a fully developed project report for a serious commercial development. It does, however, lack a number of features one might expect in an <i>academic</i> work, particularly in reflection on process and options evaluation for methodology, etc. This reflects the need to conform to company practices.	67
<u>Comment After Consultation With Other Marker & Final Agreed Mark</u> Agreed	67

	Survey	Review	Experiment	Development
1. Research-informed Literature				
Introduction	/5	/5	/5	4/5
Literature Review	/20	/35	/20	9/15
Comments: The project requirement and objectives are laid out clearly and the underlying need is properly drawn out. The literature review is suitable for the work, but doesn't consider a number of aspects one would normally see in an academic report. This is principally because some of the decisions which form part of undergraduate project work are prescribed by company doctrine for the project.				
	Survey	Review	Experiment	Development
2. Knowledge and Understanding of Subject				
Methodology	/5	/5	/5	3/5
Survey Design	/15	-	-	-
Requirements/Design	-	-	-	5/5
Comments: The methodology used is fully professional. It is not justified in any academic sense The project design has the features of commissioned work, including appropriate call off, evaluations, project milestones, design reviews and sign offs.				

	Survey	Review	Experiment	Development
3. Analysis				
Results & Discussions	/25	/25	/25	15/25
Conclusions and Recommendations	/10	/10	/10	5/10
Comments: The results are well presented, and reviewed against original targets. Again the approach is commercial rather than academic in nature. Conclusions and recommendations are logical and well formed.				
	Survey	Review	Experiment	Development
4. Practical Application and Deployment				
Development	-	-	-	15/15
Experimental Design	-	-	/15	-
Comments: Rather difficult to fault an implementation of £250K reducing costs by £440K in the first operational figures.				

	Survey	Review	Experiment	Development
5. Skills for Professional Practice				
Reflection	/10	/10	/10	5/10
Quality of Report	/10	/10	/10	6/10
Comments: The report doesn't illustrate skills for professional practice. It is an example of typical professional practice, but accordingly lacks some of the developmental and reflective features which attract credit in undergraduate project work.
