

A scenic view of a pond with purple flowers in the foreground and a bridge in the background. The image is a composite of two photos. The top photo shows a bridge over a river or pond, surrounded by lush green trees and foliage. The bottom photo shows a close-up of tall purple flowers (likely Salix) growing in a pond, with the water and bridge visible in the background.

Starling

Robin

Chaffinch

Wren

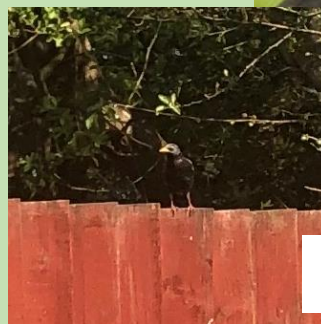

Woodpigeon

House Sparrow

Blackbird

Pinecone bird Feeder:

1. What you need:

2. Mix altogether.....

3. Add the string and the mix to the pinecone.....

4. Put in the fridge to set for one hour.....

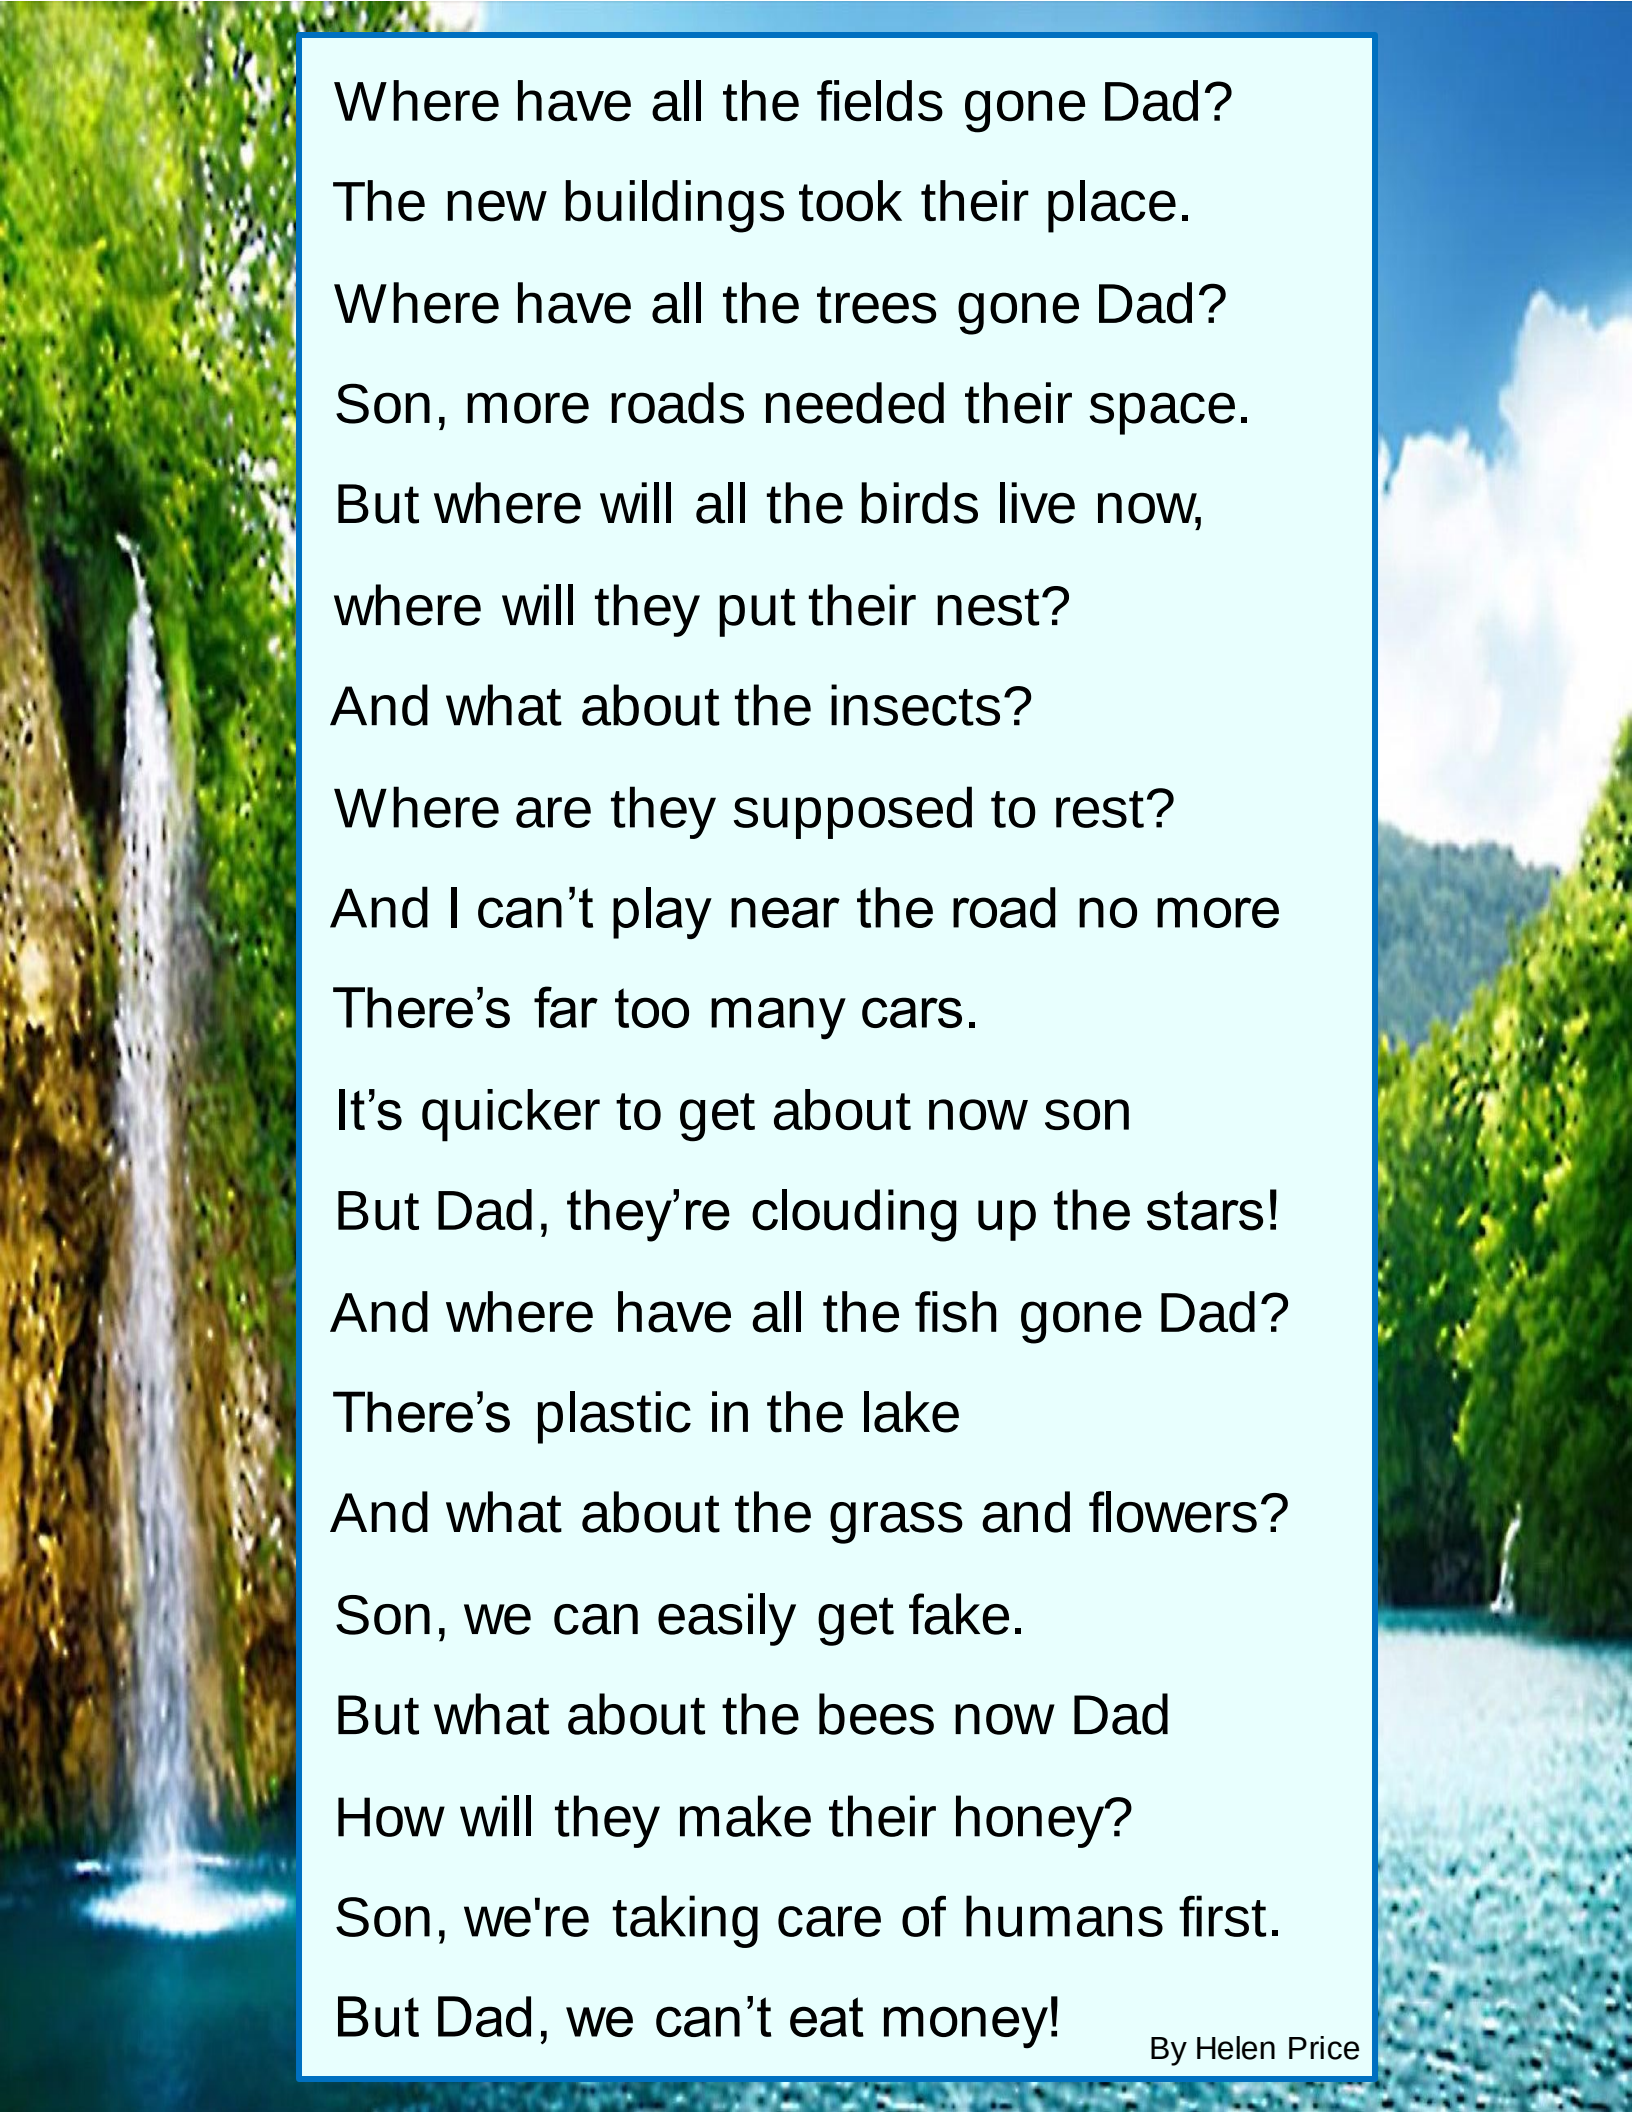

5. Hang in your garden or outside space and wait for the birds.

Although the RSPB website suggests that this type of bird feeder is more suitable for the winter as the lard may melt in the heat, bird feeders are still needed in the spring/summer. Therefore, following their simple and suitable suggestion, I added some black sunflower seeds to a cored apple instead.

Where have all the fields gone Dad?
The new buildings took their place.
Where have all the trees gone Dad?
Son, more roads needed their space.
But where will all the birds live now,
where will they put their nest?
And what about the insects?
Where are they supposed to rest?
And I can't play near the road no more
There's far too many cars.
It's quicker to get about now son
But Dad, they're clouding up the stars!
And where have all the fish gone Dad?
There's plastic in the lake
And what about the grass and flowers?
Son, we can easily get fake.
But what about the bees now Dad
How will they make their honey?
Son, we're taking care of humans first.
But Dad, we can't eat money!

By Helen Price

Conserve!

Plant a wildflower area

Create a vegetable garden

Support biodiversity

Make a bird bath

Preserve and protect the Oak tree and surrounding area

Add a water butt

Support insects

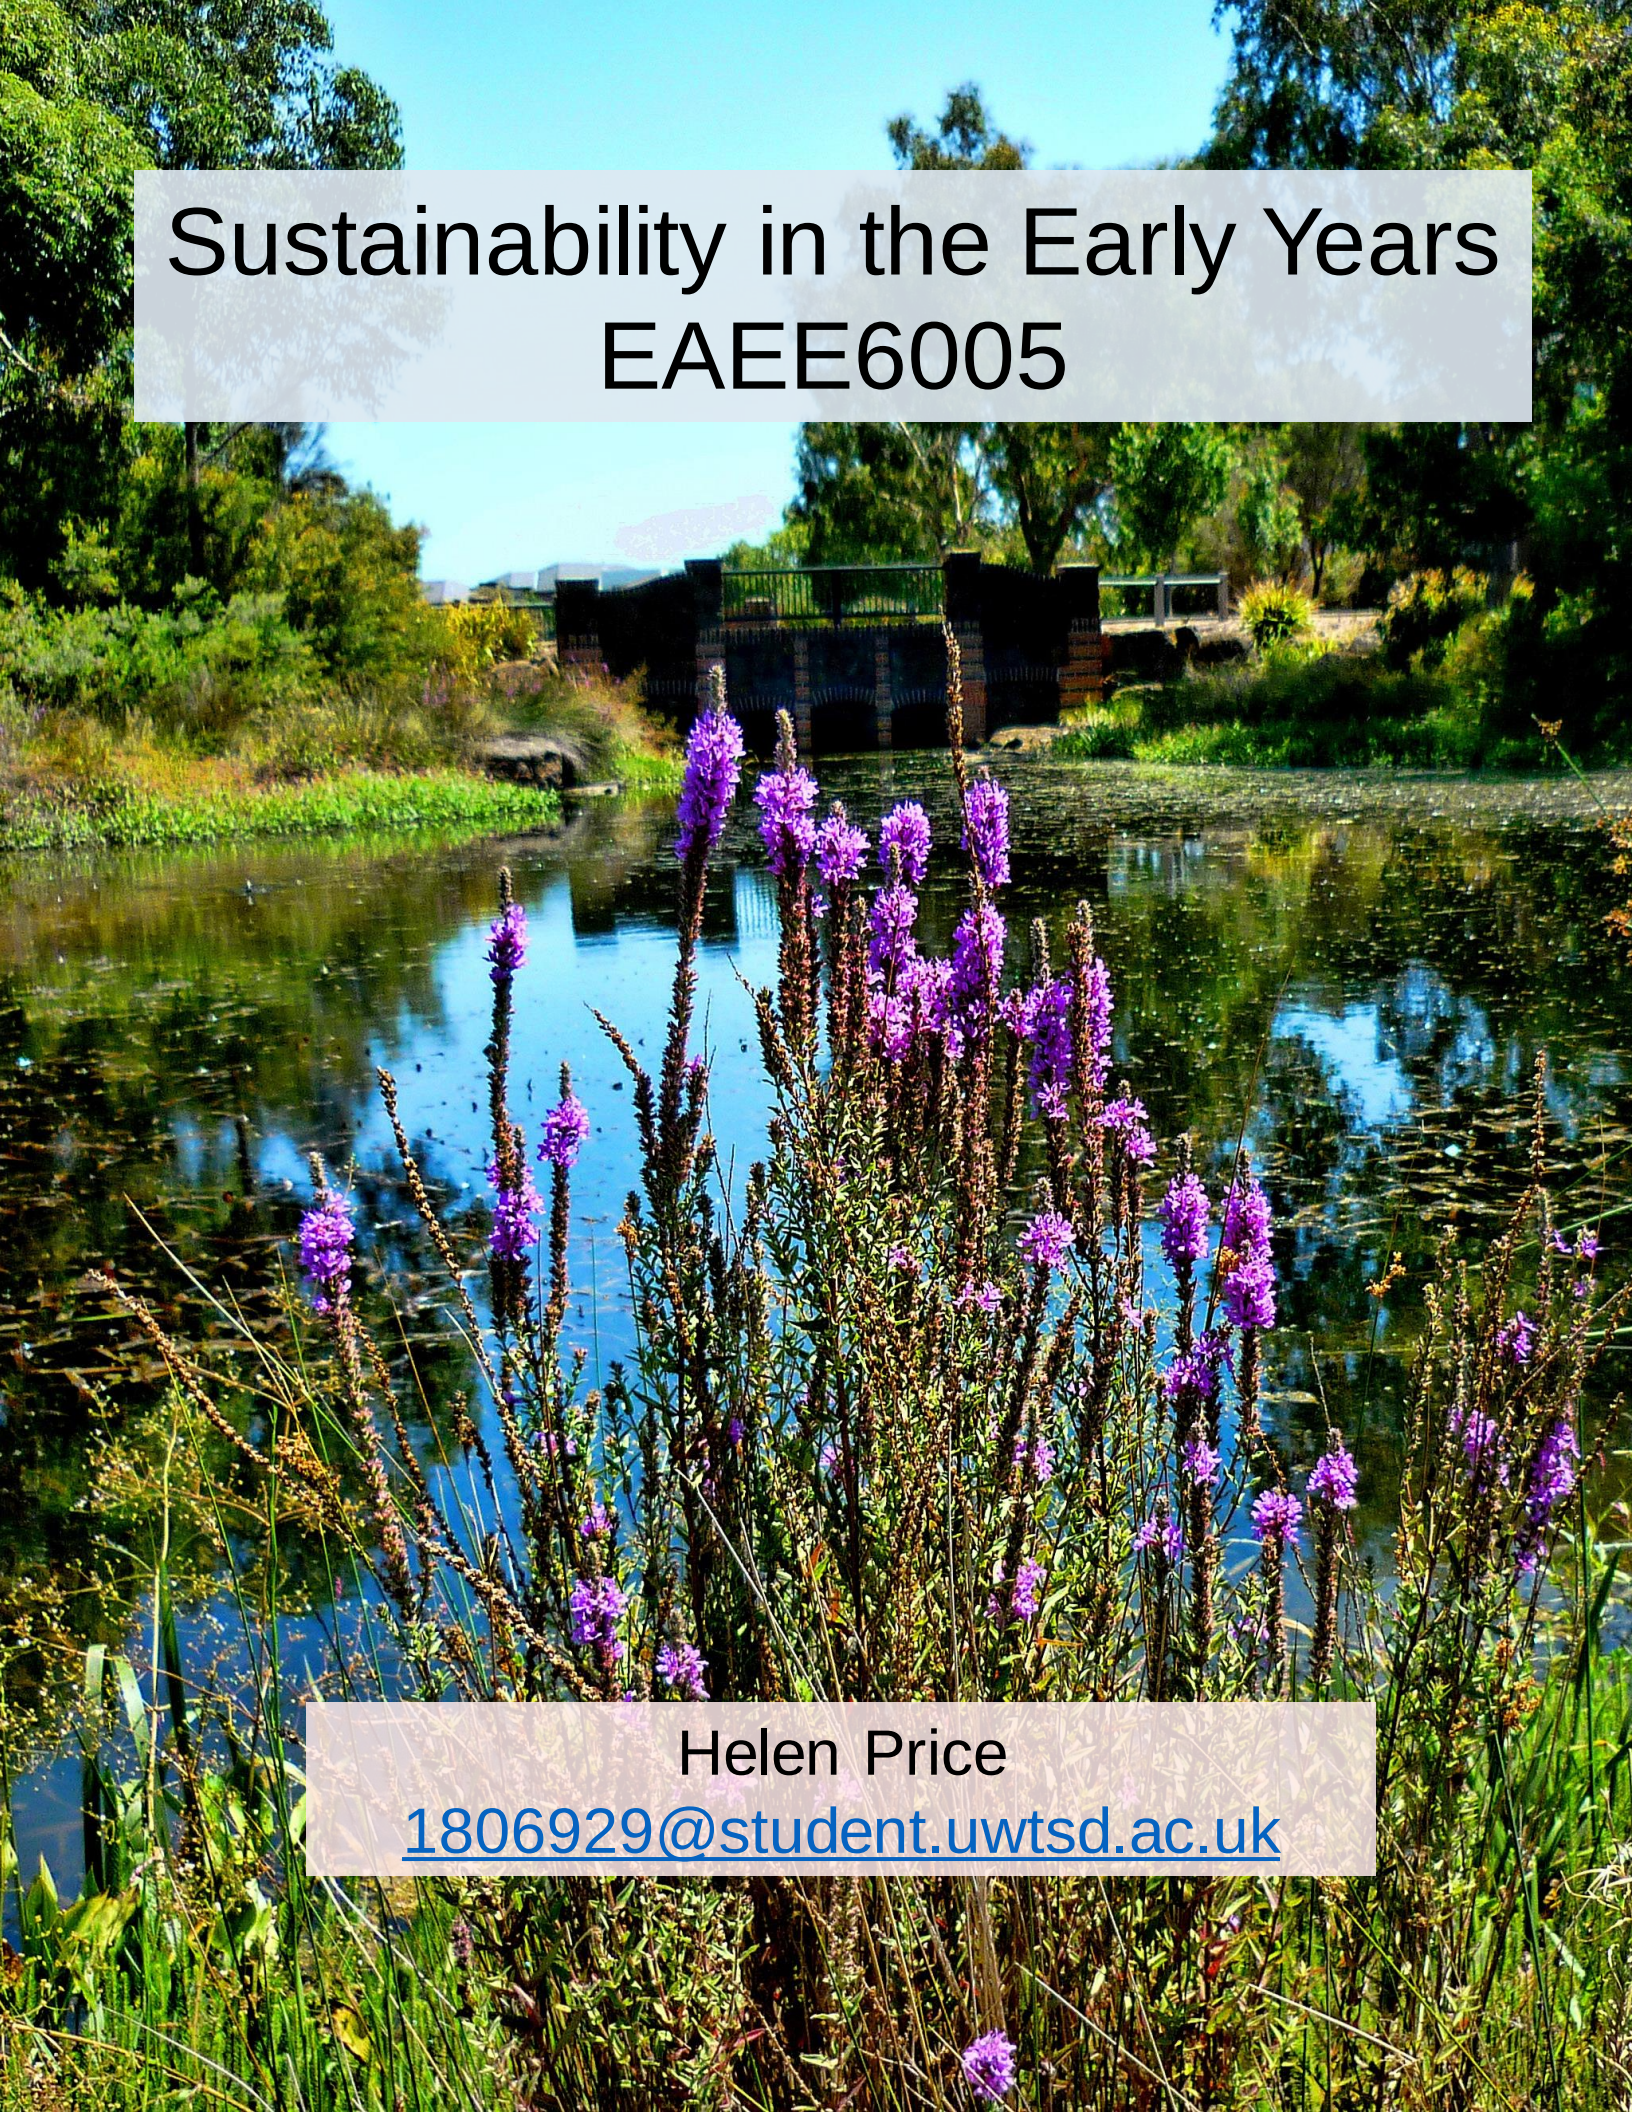

Support bees

Create a compost bin

Support a sustainable future

A scenic view of a pond with purple flowers in the foreground and a bridge in the background. The pond is surrounded by lush green trees and vegetation. The water is calm, reflecting the surrounding greenery and the sky. In the foreground, several tall, thin stalks of purple flowers are in focus. In the background, a bridge with a metal railing and stone pillars spans the pond. The sky is clear and blue.
