

INTRODUCTION

- ❖ In my presentation for Academic and Employability Skills I specify what kind of business I want to do in my future. I also explain the responsibilities of the job and what are the duties.
- ❖ In my presentation I explained which academic and employability skills are needed for the job and which one of them I already have to be professional in my job. In addition I make my presentation more professional by using picture of a empty swot analysis where I mention my Strengths, Opportunities, Weaknesses, Opportunities, and Threats.

PRESENTATION

Academic and Employability Skills

- As a goal in my future I want to build, my own company for Fire Protection and create good reputation as a business. However this job role has huge responsibility because, a Fire Protection Installer has an important role in ensuring buildings are insulated and structurally protected from fire risk.
- The job include the installation of protective frames, fire-resistant walls and ceilings, and applying fire resistant treatments, particularly on heritage buildings.

Skills I need as a Fire Protection Installer and Employability

- Ability to follow technical drawings
 - Good level of physical fitness
 - Confidence to work at height
 - Ability to use your initiative
 - Knowledge of buildings and construction
-
- Good communication
 - Motivation and initiative
 - Team work
 - Following instructions
 - Adaptability

- In my intended career I'm trying to be very well prepared with my Academic and Employability skills to achieve goals. However I have **Good Communication skills** which will allow myself to understand information more accurately and quickly, so that I can be more professional in my work. Also I have good skills in **Adaptivity** which will increase my chances of succeeding and have more confidence in my job. Also I have skills to work in a **Team** which gives me more potential and confidence in myself and improves productivity and brings better business results.
- For my career in Fire Protection I'm trying to stay updated with the work and I'm currently working as a Fire Protection Installer and exploring the job more, so that I can have better **Knowledge of buildings and construction** so I can be more productive and boost my own knowledge to reach higher position in Fire Protection Industry. Another skill which I strongly believe I have for the job rule is that I try to keep my body **physically strong** to be prepared for physically strong duties and work so that can help me to maintain them.

Strengths

- **Good Communication**
- **Adaptivity**
- **Team Work**

Weaknesses

- **I feel stressed when projects run beyond the deadline**
- **Sometimes I focused too much on details**

Opportunities

- **Working safety to minimizing hazards**
- **Providing high quality installation**
- **Feeling confidence in my workplace**

Threats

- **To work at height**
