

DIGITAL SAFETY

DIGITAL SAFETY INVOLVES A RANGE OF ACTIVITIES AND PRINCIPLES AIMED AT SAFEGUARDING PERSONAL AND COMPANIES FROM DIGITAL THREATS.

REGULAR SOFTWARE UPDATES:

- Keep all software updates
- Enable automatic updates where possible

SECURE CONNECTION

- Use VPNs when accessing company resources remotely
- Ensure wi-fi passwords are secured with strong passwords

PHISHING AWARENESS

- Be cautious of unsolicited emails and links
- Verify the senders email adress
- Do not open attachments from unknown sources

ACCESSS CONTROLS

- Limit access to sensitive information
- Implement multi-factor authentication
- Ensure that individuals privacy rights are respected

DEVICE SECUROITY

- Keep devices secure with passwords or biometric locks.
- Avoid leaving devices in unnetted places

INCIDENT REPORTING

- Report suspicious activities immediately
- Have clear instructions how to report a potential security incident
