Introduction

On this task we must set up a website about our business plan proposal for Brynah module" Managing Enterprise in the 21st Century (BMSK4006_SWAN)". In our group we decide to open a Nails Salon named "Dream Nails" where we offer nails extension, manual design with Swarovski stone, pedicure etc. The service well be friendly with professional nails technician and worm atmosphere.

Don't leave the reader wondering!

Main body

I have loads to learn and to keep on track. By constantly updating and practising what we have learned in class from our lecturer Marie Pitson will provide us more knowledge to continue and improve our digital skills. So, it's very important to keep up to date knowledge. On this module Digital Skills and Research Methods (BMSK4003_SWAN) presented by our lector Marie Pitson, I learned how to design a website in order to make a website for our business, named Dream Nails.

Much of this repeats elements from the first paragraph

In our website, we included products and their costs, contact details, and mission statement. We make the design of the website clear but professional. The website we creating is for our proposed business plan related on Brynah module" Managing Enterprise in the 21st Century (BMSK4006_SWAN)".

You already mentioned this in paragraph 1.

You have gone over the word count slightly. Take care to proof read your work prior to submission, and avoid repeating information

On this project we should to be a team of 6 people but in the end we finish only in ^{two} tow member^s. We discussed about the key features of a website. On this list we included: colour scheme, layout, photos, the name of the organisation, map, payment service, contact number, address, customer service, audience, narrative writing, advertisement etc.

I have many ideas on my mind to design my website related to my business. The homepage colour and theme are in mind, the only problem is how I can upload the business logo on my website.

Me and my teammate already did the website and the problem we facing is how to submit the link in "turninit" If we have a business but don't have a website, we losing out on great opportunities for the concerned business. The website itself can be used to accomplish many different marketing strategies to help the business grow. What offer we are doing for consumers that if consumers know about the related products and how consumer reach to the business if they don't have a website. We should all know that by now, but surprisingly what we don't all know, what benefits a website can provide for the concerned business and its shocking how many don't have a website or online presence. On the last lesson me and my teammate working on the website and completing the charts for the result of the questionnaire. We did this questioner to provide information about our future costumer. We also must be ready for this week in class

exams, "scary times". We have a week remaining until we finish the course, and we have a lot of work left to do so we must give one last push to get the work completed.

Conclusion

My contribution on all this work was to do the research about location, how much the rent ^{will} be, position of the shop, looking on neighbourhood if we have any competitors, to find a ^{good} looking picture. I think our Website is look professional

I am so happy to have Marie Pitson as lector from start of this year to the end.

Thank you Marie.
