Which digital tool is most used by students at uwtsd to collaborate?

Introduction

My research has been about searching different digital tools students at uwtsd use with my main focus on the question which digital tool is mostly used to collaborate together

All information in this powerpoint is based on relevant search

Which digital tool is easy to collaborate with ?

Microsoft 365 is one of the most effective tools

Microsoft Teams is already included in your Office 365 .With Microsoft u can share files, organize meetings from their calendar, and sync with Office apps such as OneNote, OneDrive, and Outlook. This improves collaboration and communication while simultaneously aiding the company adoption of Microsoft 365.

Microsoft teams integrates with Office 365 applications, giving users easy access to Excel, PowerPoint, and Word. Teams utilizes cloud storage and syncing solutions such as SharePoint and Power BI. Within Teams you can also use 3rd party applications such as YouTube, Wikipedia, Evernote, Zendesk and more!

By bringing all these different tools together into an all-purpose omnichannel collaboration hub, you will allow employees to seamlessly switch between video chat, instant messages, email, and document collaboration.

All UWTSO students have access to Microsoft Teams to communicate and collaborate (University Wales Trinity Saint David, 2022).

Microsoft Teams is a centralised hub for communication and collaboration within a team, department or student group allowing you to share content and access other apps.

Table chart

Which digital tool is the most effective?	Tally
Microsoft 365	
Team	
zoom	
facebook	
outlook	

To get a better understanding and knowledge on which digital tool is used most by students we will be doing a tally chart .

We will analyse the results with the quantitative methods.

conclusion

We predict that Microsoft Teams will be the most used tool by students at UWTSD, based on our based on our research (Zaagman, 2021; University Wales Trinity Saint David, 2022).

Directional Hypothesis – Microsoft Teams is the most used tool by students at UWTSD.

Non Directional Hypothesis - There will be no tool significantly used more then others at UWTSD.
